Proposed Project

Coal Workers’ Health Surveillance Program (CWHSP) (OMB Control No. 0920-0020, Exp. 03/31/2025)—Reinstatement—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

NIOSH would like to submit an Information Collection Request (ICR) to continue the data collection instruments being utilized within the Coal Workers’ Health Surveillance Program (CWHSP). This request incorporates all components of the CWHSP. Those components include: Coal Workers’ X-ray Surveillance Program (CWXS), B Reader Program, Enhanced Coal Workers’ Health Surveillance Program (ECWHSP), Expanded Coal Workers’ Health Surveillance Program, and National Coal Workers’ Autopsy Study (NCWAS).

The CWHSP is a Congressionally mandated medical examination program for monitoring the health of coal miners and was originally established under the Federal Coal Mine Health and Safety Act of 1969 with all subsequent amendments (the Act). The Act provides the regulatory authority for the administration of the CWHSP. This Program, which operates in accordance with 42 CFR part 37, is useful in providing information for protecting the health of, and in documenting trends and patterns in the prevalence of coal workers’ pneumoconiosis (‘black lung’ disease) among U.S. coal miners.

Data is used for early detection, tracking, assessment, and ultimately prevention and/or treatment of coal workers’ pneumoconiosis. It also serves to identify the incidence and possible progression of coal mine dust-induced disease in coal miners. In order to assess progression of disease it is important to obtain longitudinal measurements of past participants.

CDC requests OMB approval for an estimated 4,070 annual burden hours. There is no cost to respondents other than their time to participate.
