

be self-administered at home on personal computers, tablets, or phones. A web survey has numerous methodological advantages, including increased accuracy in measurement of key variables of interest, and reduced burden on study participants. Respondents in this study will be

members of the general public. This collection will not involve small business or small entities.

The estimated annualized hour burden of responding to this information collection is 1,333 hours, or a weighted average of 20 minutes (.33 hours) per respondent. The hour-burden

estimate includes the time spent by a respondent to read the email invitation, review the online consent or assent (minor), and complete the survey. Participation is voluntary and there are no costs to respondents other than their time. OMB approval is requested for three years.
