NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: National Science Foundation.

ACTION: Notice.

SUMMARY: Under the Paperwork Reduction Act of 1995, Pub. L. 104-13 (44 U.S.C. 3501 et seq.), and as part of its continuing effort to reduce paperwork and respondent burden, the National Science Foundation (NSF) is inviting the general public or other Federal agencies to comment on this proposed continuing information collection

DATES: Written comments on this notice must be received by November 13, 2000 to be assured of consideration.

Comments received after that date will be considered to the extent practicable.

FOR FURTHER INFORMATION CONTACT: For further information or for a copy of the collection instrument and instructions contact Ms. Suzanne H. Plimpton, Reports Clearance Officer, via surface mail: National Science Foundation, ATTN: NSF Reports Clearance Officer, Suite 295, 4201 Wilson Boulevard, Arlington, VA 22230; telephone (703) 292-7556; e-mail splimpto@nsf.gov; or FAX (703) 292-9188. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Title of Collection: 1999 Survey of Doctorate Recipients.

OMB Control No.: 3145-0020.

Expiration Date of Approval: April 30, 2001.

Abstract

The Survey of Doctorate Recipients (SDR) has been conducted biennially since 1973. For the 2001 cycle, a sample of individuals under the age of 76 who

have earned doctoral degrees in science and engineering from U.S. institutions will be surveyed. The purpose of the study is to provide national estimates describing the relationship between education and employment for Ph.D. recipients in science and engineering. The study is one of three components of the Scientists and Engineers Statistical Data System (SESTAT), which produces national estimates of the size and characteristics of the nation's science and engineering population.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to “* * * provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by other agencies of the Federal Government.” The Survey of Doctorate Recipients is designed to comply with these mandates by providing information on the supply and utilization of doctorate level scientists and engineers. Collected data will be used to produce estimates of the characteristics of these individuals. They will also provide necessary input into the SESTAT labor force data system, which produces national estimates of the size and characteristics of the country's science and engineering population. The Foundation uses this information to prepare congressionally mandated reports such as Women and Minorities in Science and Engineering and Science and Engineering Indicators. A public release file of collected data, designed to protect respondent confidentiality, is expected to be made available to researchers on CD-ROM and on the World Wide Web.

Questionnaires will be mailed in April 2001 and nonrespondents to the mail questionnaire will be contacted by computer assisted telephone interviewing (CATI). The survey will be collected in conformance with the Privacy Act of 1974 and the individual's response to the survey is voluntary. NSF will insure that all information collected will be kept strictly confidential and will be used only for research or statistical purposes, analyzing data, and preparing scientific reports and articles.

Expected Respondents

We will mail the survey to a statistical sample of approximately 40,000 U.S. doctorates.

Burden on the Public

The amount of time to complete the questionnaire may vary depending on an individual's circumstances; however, on average it will take approximately 25

minutes to complete the survey. We estimate that the total annual burden will be 16,666 hours during the year.

Special Areas for Review: NSF requests special review and comments in the following areas:

(a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Foundation, including whether the information will have practical utility;

(b) The accuracy of the Foundation's estimate of the burden of the proposed collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) Ways to minimize the burden of the collection of information on those who are to respond.

Dated: September 6, 2000.

Suzanne H. Plimpton,

NSF Reports Clearance Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-412]

Pennsylvania Power Company, Ohio Edison Company, the Cleveland Electric Illuminating Company, the Toledo Edison Company, FirstEnergy Nuclear Operating Company, Beaver Valley Power Station, Unit 2; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-73 issued to FirstEnergy Nuclear Operating Company (the licensee) for operation of the Beaver Valley Power Station, Unit 2, located in Beaver County, Pennsylvania.

The proposed amendment would revise certain 18-month surveillance requirements in the technical specifications by eliminating the condition that testing be conducted during shutdown, or during cold shutdown or refueling mode. The systems that would be affected are the emergency core cooling system (ECCS), containment depressurization and cooling system, chemical addition system, and containment isolation valve system. The proposed amendment would not change the current type and frequency of the 18-month surveillances for these systems.
