

OSM has identified three possible alternatives that the combined PED/EIS would evaluate:

- Alternative 1—Designate the entire petition area as unsuitable for surface coal mining operations.
- Alternative 2—Not designate any of the area as unsuitable for surface coal mining operations.
- Alternative 3—Designate parts of the petition area as unsuitable for all or certain types of surface coal mining operations.

A scoping comment period is intended to raise the relevant issues to be addressed by the combined document. OSM seeks public comments in relation to the scope of issues to be addressed by the impact evaluation, including impacts and alternatives that should be addressed. Written comments should be specific and confined to issues pertinent to the petition. The public comments received during the scoping period will assist OSM in making decisions on the petition evaluation and in preparing the PED/EIS. OSM believes that the proposed action is a major Federal action that may significantly affect the quality of the human environment and may require the preparation of an EIS. OSM additionally gives notice here that should information or analyses show that the proposed action does not require an EIS, we will terminate the EIS process through an appropriate notice in the **Federal Register**, prepare an environmental assessment, and continue processing of the petition under the regulations at 30 CFR parts 764 and 942.
