Title: Information Requirements for Importation of Nonconforming Vehicles.

Abstract: Individuals and businesses importing motor vehicles and motor vehicle engines, and nonroad compression ignition engines greater than 50 horsepower (large CI nonroad engines), which are predominantly used in construction equipment and farm tractors, report and keep records of vehicle importations, or request final admission for vehicles conditionally imported into the U.S. The collection of this information is mandatory in order to ensure compliance of nonconforming vehicles with Federal emissions requirements. Joint EPA and Customs regulations at 40 CFR 85.1501 *et seq.*, 89.601 *et seq.*, 90.601 *et seq.*, and 19 CFR 12.73 and 12.74 promulgated under the authority of Clean Air Act sections 203 and 208 give authority for the collection of information. This authority was extended to nonroad engines under section 213(d). The information is used by program personnel to ensure that all Federal emission requirements concerning imported nonconforming motor vehicles and nonroad engines are met. Any information submitted to the Agency for which a claim of confidentiality is made is safeguarded according to policies set forth in Title 40, Chapter 1, Part 2, Subpart B—Confidentiality of Business Information (see CFR 2), and the public is not permitted access to information containing personal or organizational identifiers.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is

estimated to average 0.7 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Individuals and businesses importing motor vehicles and motor vehicle engines.

Estimated Number of Respondents: 13,000.

Frequency of Response: Other—upon importation.

Estimated Total Annual Hour Burden: 15,800.

Estimated Total Annual Cost: \$1,664,000, which includes \$0 annualized capital and \$1,266,000 O&M costs.

Changes in the Estimates: There is an increase of 1,400 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to an increase in the number of engines tested and the associated cost.

Dated: August 22, 2003.
