Day 2

VII. New Business

a. **Task Statement #04–23:** Review the multi-year statistics (provided by the USCG) regarding commercial fishing vessels of less than 200 gross ton accidents or losses that resulted in fatalities, injuries, or property damage. Major marine casualties such as the loss of the DESTINATION, NO LIMITS, and other fishing vessels with multiple fatalities and vessel losses should be reviewed to provide the background information necessary to other supplementary taskings in best efforts to make informed recommendations to the USCG.

b. **Task Statement #05–23:** Examine and make recommendations to the USCG on best practices to reduce and mitigate the negative consequences caused by the misalignment of state and federal regulations regarding drug laws legalizing the recreational and/or medical use for drugs also classed as dangerous drugs by federal law and applicable transportation related statutes. This is critical for the safety of operations and creating an environment for vessel personnel to work in a drug-free workplace, with special emphasis on critical safety sensitive jobs such as navigation and engineering duties to bring fishing vessels into alignment with other commercial vessels. Develop recommendations that include testing for pre-employment, routine, and reasonable cause. Submit recommendations to the Secretary of Homeland Security.

c. **Task Statement #06–23:** Examine and effectively disseminate recommendations for best practices to ensure full crew access to all parts of a vessel to allow for safe vessel operation. This task should address and examine things like a means to access all areas of the vessel and allow the crew to safely move fore and aft to remove ice, inspect the vessel, and operate critical equipment like the vessel’s anchors and similar gear that does not require the crew to climb over the pot stack (for example, in the case of a vessel carrying pots, nets or similar devices to create pathways for access). Submit recommendations to the Secretary of Homeland Security.

d. *Task Statement #07–23*: Establish best practices for standard procedures and guidance for crew standing navigation watches. This should include a detailed crew orientation for each unique vessel, including the operation of critical equipment and establish clear and easily understood watchstanding orders to protect the safety of the vessel during its applicable operations. This could be accomplished as a standardized form or checklist. Submit recommendations to the Secretary of Homeland Security.

e. *Task Statement #08–23*: Evaluate and provide a comprehensive list of recommendations to the USCG, in the form of best practices (NVICs, policies, training), or amended or new regulations, regarding stability considerations which may pose severe risk to the safety of a fishing vessel such as icing, loading, the need for stability instructions, and vessel modifications. As part of this task, review the USCG's current level of oversight, provide recommendations on its adequacy, and specify needed changes to areas of the fishing safety program that need additional attention. Submit recommendations to the Secretary of Homeland Security.

f. *Task Statement #09–23*: Evaluate and provide recommendations to the USCG for best practices to address the high degree of risk associated with fishing vessel operations and how the acceptance of risk is prevalent and accepted in the fishing industry. Specifically, the Marine Board recommends the committee focus on topics including icing, heavy weather avoidance in voyage planning, and formalizing the navigation watch duties via onboard familiarization and written standard orders to ensure the safety of vessel during its transit and during fishing operations. Submit recommendations to the Secretary of Homeland Security.

g. *Task Statement #10–23*: Evaluate and provide recommendations to the USCG to ensure the most effective means to widely disseminate critical safety information for the commercial fishing industry. Submit recommendations to the Secretary of Homeland Security.

h. *Task Statement #11–23*: Review and provide recommendations on the development of a publicly accessible website that contains all information related to fishing industry activities, including vessel safety, inspections, enforcement, hazards, training, regulations (including proposed regulations), outages of the Rescue 21 system in Alaska and similar outages, and any other fishing-related activities.

Submit recommendations to the Secretary of Homeland Security.

i. *Task Statement #12–23*: Discuss and make recommendations requiring watch alarms on specific types of commercial fishing vessels. Submit recommendations to the Secretary of Homeland Security.

j. *Task Statement #13–23*: Examine and make recommendations to the USCG on a way to widely distribute personal location beacons at minimal expense. Ensure availability and access for crewmembers of these critical lifesaving devices which could be acquired by consortiums, associations, or other organizations for distribution to vessel crews through federally funded grant programs or other programs. Submit recommendations to the Secretary of Homeland Security.
