What information is EPA particularly interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) enhance the quality, utility, and clarity of the information to be collected; and
- (iv) minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What should I consider when I prepare my comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What information collection activity or ICR does this apply to?

Docket ID No.: EPA-HQ-OAR-2003-0034.

Affected entities: Entities potentially affected by this action are those engaged in primary aluminum production.

Title: Reporting Requirements under the Voluntary Aluminum Industrial Partnership (VAIP).

ICR numbers: EPA ICR No. 1867.05, OMB Control No. 2060-0411.

ICR status: This ICR is currently scheduled to expire on April 30, 2012. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA

regulations is consolidated in 40 CFR part 9.

Abstract: EPA's Voluntary Aluminum Industrial Partnership (VAIP) was initiated in 1995 and is an important voluntary program contributing to the overall reduction in emissions of greenhouse gases. This program focuses on reducing direct greenhouse gas emissions including perfluorocarbon (PFC) and carbon dioxide (CO₂) emissions from the production of primary aluminum. Seven of the eight U.S. producers of primary aluminum participate in this program. PFCs are very potent greenhouse gases with global warming potentials several thousand times that of carbon dioxide and they persist in the atmosphere for thousands of years. CO₂ is emitted from consumption of the carbon anode. EPA has developed this ICR to renew authorization to collect information from companies in the VAIP. Participants voluntarily agree to the following: Designate a VAIP liaison; set emission reduction goals, undertake technically feasible and cost-effective actions to reduce PFC and direct CO₂ emissions, and share information on best practices to reduce emissions. The information is used by EPA to support the sector-wide adoption of cost-effective technically feasible greenhouse gas emissions and assess the success of the program in achieving its goals.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 30.0 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and training systems for the purposes of collecting, validating, and verifying emission reduction information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to emission reduction information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 7

Frequency of response: Annual.

Estimated total average number of responses for each respondent: One per respondent per year.

Estimated total annual burden hours: 30 hours.

Estimated total annual costs: \$10,000. This includes an estimated burden cost of \$10,000 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

Are there changes in the estimates from the last approval?

There is a decrease of 60 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects that effective in 2010, all producers of primary aluminum are subject to mandatory reporting under EPA's Greenhouse Gas Reporting Program (GGRP). Emissions data collection and reporting efforts are no longer components of the voluntary activities covered by this information collection request. Consequently, the overall burden has decreased from 90 hours to 30 hours with the corresponding decrease in the previously estimated reporting burden.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: February 10, 2012.

Rona Birnbaum,

Acting Director, Climate Change Division.
