

different presentations of the residence rules instructions (*See Definition of Terms*) included on the 2005 NCT questionnaire. We also will create, test and analyze an automated version of the paper coverage followup questionnaire used in the 2004 Census Test.

The Census Bureau will conduct the CFU operation from November 1, 2005 through March 6, 2006.

II. Method of Collection

Approximately 60,000 households will be included in the followup sample for this operation. The sample is broken down into five categories:

- Households that responded “yes” to either coverage question;
- A sample of households that responded “no” to both coverage questions;
- Households that contain at least one match between the StARS database (*see Definition of Terms*) and 2005 NCT data and at least one nonmatch in StARS. This will identify households with potentially missed people.
- Households containing more than six persons; and
- Households that were not asked any coverage questions.

The coverage questions for the 2005 CFU operation will be chosen based on the results of cognitive tests using four revised versions of the 2004 Census Test undercount question (Question 2) and overcount question (Question 10). These questions are designed to ensure that each individual is counted once and only once and in the right place.

The CFU interviewers will attempt to contact, via telephone, all the households that fall in the CFU sample. The followup interview will be conducted at the Census Bureau telephone call centers by U.S. Census Bureau staff. These questions will be conducted using computer-assisted telephone interviewing (CATI). The results will be used to further improve and enhance the questionnaire for the 2010 Census. For this operation, there will be no field followup (i.e. personal visits by enumerators) for those households that refuse to give information over the telephone and those households that telephone interviewers are unable to reach.

The purpose of the CFU telephone contact is to identify those persons who may have been counted in more than one household or erroneously excluded from any household. The items included in the 2005 CFU questionnaire are probes that are intended to indicate whether respondents understood and properly applied the residence rules instructions on the 2005 NCT questionnaire.

Definition of Terms

Coverage—How well the Census Bureau counts people and housing units in the census.

Residence Rules Instructions—Instructions that respondents use to determine who should be counted in that household. They are meant to insure that everyone is counted once and in the right place for the primary purposes of apportionment and redistricting.

StARS—The Statistical Administrative Records System (StARS) is an administrative records database built from six national level data files.
