Title: Section 73.213—Grandfathered Short-Spaced Stations.

Form Number: FCC 301/340.

Type of Review: Extension of currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 15.

Estimated time per response: 5 hours (4.5 hours consulting engineer, 0.5 hours licensee).

Frequency of responding: Reporting, on occasion, third party disclosure.

Total annual burden: 9 hours.

Total annual costs: \$10,810.

Needs and Uses: Section 73.213 requires licensees of grandfathered short-spaced FM stations seeking to modify or relocate their stations to provide a showing demonstrating that there is no increase in either the total predicted interference area or the associated population (caused or received) with respect to all grandfathered stations or increase the interference caused to any individual stations. Applicants must demonstrate that any new area predicted to lose service as a result of interference has adequate service remaining. In addition, licensees are required to serve a copy of any application for co-channel or first-adjacent channel stations proposing predicted interference caused in any area where interference is not currently predicted to be caused upon the licensee(s) of the affected short-spaced station(s).

The data are used by Commission staff to determine if the public interest will be served and that existing levels of interference will not be increased to other licensed stations. Providing copies of application(s) to affected licensee(s) will enable potentially affected parties to examine the proposals and provide them an opportunity to file informal objections against such applications.

Federal Communications Commission.

William F. Caton,

Deputy Secretary.
