FDM resides on the HUD OCIO Local Area Network (LAN). The HUD OCIO Infrastructure and Operations Office (IOO) secures the Stennis and Clarksville Data Centers where the LAN resides, and for backing up and encrypting FDM data. FDM sends and receives data through HUD SFTP (Security File Transfer Protocol), which encrypts the data. SSNs are encrypted in the database.

Supervisors determine and authorize FDM access for their employees, and OCFO checks their suitability by ensuring the user's investigation record is appropriate. The majority of FDM users are read-only and cannot enter data into FDM. An annual system user recertification is conducted to ensure each FDM user requires access to the system.

The BLM anticipates reliance on the referenced CX, subject to extraordinary circumstances review,

should the Secretary elect to extend the withdrawal, and anticipates that neither preparation of an environmental impact statement nor an environmental assessment will be necessary.
