

Commission (IATTC) results in certain recordkeeping requirements for U.S. fishermen who fish in the IATTC's area of management responsibility. These fishermen must maintain a log of all operations conducted from the fishing vessel, including the date, noon position, and the tonnage of fish aboard the vessel, by species. The logbook form provided by the IATTC is universally used by U.S. fishermen to meet this recordkeeping requirement. The information in the logbooks includes areas and times of operation and catch and effort by area. Logbook data are used in stock assessments and other research concerning the fishery. If the data were not collected or if erroneous data were provided, the IATTC assessments would likely be incorrect and there would be an increased risk of overfishing or inadequate management of the fishery.

Affected Public: Business or other for-profit organizations.

Frequency: Daily when on fishing trips.

Respondent's Obligation: Mandatory.

references to HTSUS numbers. Such references were intended to describe types of products that were either included in or excluded from the scope of FTZ Board actions. The scope of FTZ Board Orders will continue to apply to those products as described in the orders and related appendices, even though the HTSUS number associated with the product may change. The scope of FTZ Board Orders should be interpreted as applying to the new HTSUS numbers. Similarly, the addition of new classifications to the HTSUS does not imply authority for any new production activity (including new categories of foreign status components or finished products) requiring advance approval by the FTZ Board.

The following table provides a list of 2012 HTSUS changes relating to FTZ Board Orders for oil refinery subzones:
