Title of Proposal: Pre-Purchase Homeownership Counseling Demonstration and Impact Evaluation.

Description of the need for the information and proposed use: This request is for the clearance of data collection instruments designed to collect the information necessary to conduct a random assignment evaluation of pre-purchase homeownership counseling. The evaluation will produce valuable information about the impact of pre-purchase homeownership counseling on a range of outcomes for low- to moderate-income first-time FHA home buyers. Four thousand study

participants will be enrolled through the branch offices and telephone centers of three national lenders in 10 jurisdictions throughout the country. Lender staff will ask potential home buyers to voluntarily participate in the study, directing interested participants to the telephone call-in research center for the eligibility assessment and baseline survey. To achieve 4,000 enrolled study participants, the intake and eligibility assessment will be conducted with up to 7,000 potential study participants over a period of 9 to 10 months. Additionally, 45 study participants will be asked to participate in semi-structured follow-up interviews that seek to learn about participants' experiences with enrollment and interaction with participating counseling agencies.

In each of the 10 jurisdictions for the study, local counseling agencies and national counseling intermediaries will be recruited to provide (a) Online education and telephone counseling and (b) in-person education and counseling. One national provider will be responsible for the online education and telephone counseling. Local counseling agencies will be recruited to provide the in-person education and counseling. In each case, the counseling agencies will be responsible for documenting the counseling services provided to the 2,300 study participants assigned to receive one of these types of counseling (the remaining 1,700 study participants constitute the control group). Staff of the lenders and counseling agencies will be asked to participate in semi-structured interviews that seek to understand the enrollment process and provision of counseling in each jurisdiction. The purpose of these data collection activities is to collect the information needed to evaluate the impact of pre-purchase housing counseling.
