SUPPLEMENTARY INFORMATION:

Background

In accordance with section 705(d) of the Tariff Act of 1930, as amended (the Act), on June 19, 2009, the Department published its final determination in the countervailing duty investigation of lawn groomers from the PRC. *See Certain Tow-Behind Lawn Groomers and Certain Parts Thereof From the People's Republic of China: Final Affirmative Countervailing Duty Determination*, 74 FR 29180 (June 19, 2009).

On July 27, 2009, the ITC notified the Department of its final determination, pursuant to section 705(b)(1)(A)(i) of the Act, that an industry in the United States is materially injured by reason of subsidized imports of subject merchandise from the PRC. *See Certain Tow-Behind Lawn Groomers from China*, USITC Pub. 4090, Investigation Nos. 701-TA-457 and 731-TA-1153 (Final) (July 2009).

Scope of the Order

The scope of this order covers certain non-motorized tow behind lawn groomers, manufactured from any material, and certain parts thereof. Lawn groomers are defined as lawn sweepers, aerators, dethatchers, and spreaders. Unless specifically excluded, lawn groomers that are designed to perform at least one of the functions listed above are included in the scope of this order, even if the lawn groomer is designed to perform additional non-subject functions (e.g., mowing).

All lawn groomers are designed to incorporate a hitch, of any configuration, which allows the product to be towed behind a vehicle. Lawn groomers that are designed to incorporate both a hitch and a push handle, of any type, are also covered by the scope of this order. The hitch and handle may be permanently attached or removable, and they may be attached on opposite sides or on the same side of the lawn groomer. Lawn groomers designed to incorporate a hitch, but where the hitch is not attached to the lawn groomer, are also included in the scope of the order.

Lawn sweepers consist of a frame, as well as a series of brushes attached to an axle or shaft which allows the brushing component to rotate. Lawn sweepers also include a container (which is a receptacle into which debris swept from the lawn or turf is deposited) supported by the frame. Aerators consist of a frame, as well as
