

requesting that for the year 2003 and beyond, all NDA holders for MDIs to be produced using EUAs, submit an application to EPA for EUAs as specified in this notice. Please note, EPA will also consider applications submitted jointly by contract fillers. In the case where a contract filler produces a portion of an NDA holder's CFC MDIs, the contract filler and the NDA holder should work together to determine the total amount of CFCs necessary to produce the NDA holder's entire product line of CFC MDIs. The NDA holder should also provide an estimate of how the CFCs would be split between the contract filler and the NDA holder in the allocation year. This estimate will be used only as a basis for determining the nomination amount, and may be adjusted prior to allocation of EUAs.

Since the U.S. government can not forward incomplete or inadequate nominations to the Ozone Secretariat, it is important for applicants to provide all information requested in the Handbook, including the information specified in the supplemental research and development form (page 43). The accounting framework matrix in the Handbook titled "Table IV: Reporting Accounting Framework for Essential Uses Other Than Laboratory and Analytical" requests data for the year 2000 on the amount of ODS exempted for an essential use, the amount acquired by production, the amount acquired by import, the amount on hand at the start of the year, the amount available for use in 2000, the amount used for the essential use, the quantity contained in exported products, the amount destroyed, and the amount on hand at the end of the year. Because the data necessary to complete Table IV will not be available until after January 1, 2001, companies should not include this chart with their EUA applications in response to this notice. EPA plans to send letters to each essential use applicant requesting the information in Table IV in the first 2 weeks of January 2001. Companies will have only fourteen days in which to respond since EPA must compile companies' responses to complete the U.S. CFC Accounting Framework for submission to the Parties to the Montreal Protocol by the end of January.

EPA anticipates that the 2001 review by the Parties of MDI essential use requests will focus extensively on research efforts underway to develop alternatives to CFC MDIs, on education programs to inform patients and health care providers of the CFC phaseout and the transition to alternatives, and on steps taken to minimize CFC use and emissions including efforts to recapture

or reprocess the controlled substance. Accordingly, applicants are strongly advised to present detailed information on these points, including the scope and cost of such efforts and the medical and patient organizations involved in the work. Applicants can strengthen their exemption requests by submitting a complete set of education materials, including copies of printed, electronic or audio-visual tools. Applicants are given notice that exemption requests without adequate information on research and education will not be considered complete.

Applicants should submit their exemption requests to EPA as noted in the ADDRESSES section at the beginning of today's notice.

Dated: October 25, 2000.

Robert Perciasepe,

Assistant Administrator, Office of Air and Radiation.
