

4. *The form number, if applicable:*
Not applicable.

5. *How often the collection is required or requested:* There is a one-time application for any licensee wishing to renew the operating license for its nuclear power plant. There is a one-time requirement for each licensee with a renewed operating license to submit a letter documenting the completion of inspection and testing activities. All holders of renewed licenses must perform yearly record keeping.

6. *Who will be required or asked to respond:* Commercial nuclear power plant licensees who wish to renew their operating licenses and holders of renewed licenses.

7. *The estimated number of annual responses:* 66 (11 reporting responses + 55 recordkeepers).

8. *The estimated number of annual respondents:* 62 (1 initial license renewal application + 1 subsequent license renewal application + 5 completion letters + 55 recordkeepers).

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 216,700 (160,200 hours reporting + 56,500 hours recordkeeping).

10. *Abstract:* 10 CFR part 54 establishes license renewal requirements for commercial nuclear power plants and describes the information that licensees must submit to the NRC when applying for a license renewal. The application must contain information on how the licensee will manage the detrimental effects of age-related degradation on certain plant systems, structures, and components to continue the plant's safe operation during the renewal term. The NRC needs this information to determine whether the licensee's actions will be effective in assuring the plants' continued safe operation during the period of extended operation. Holders of renewed licenses must retain in an auditable and retrievable form, for the term of the renewed operating license, all information and documentation required to document compliance with 10 CFR part 54. The NRC needs access to this information for continuing effective regulatory oversight.

Dated: August 17, 2021.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.
