

number on the carapace of, and release up to 75 hawksbill sea turtles annually. Only 6 turtles will be initially marked with the painted number to test the efficacy of the this procedure, and future decisions concerning the value and use of this technique will be based on the results. The purpose of the research is to determine the abundance, distribution and movement patterns of this species. It will also provide growth rate information about these turtles and the researcher will determine the feasibility of photographic identification through unique individual characteristics. The permit duration is 5 years.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of the endangered species which is the subject of this permit, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: December 23, 2003.
