SUPPLEMENTARY INFORMATION:

A. Purpose

To protect the Government's interest and to ensure timely delivery of items of the requisite quality, contracting officers, prior to award, must make an affirmative determination that the prospective contractor is responsible, *i.e.*, capable of performing the contract. Before making such a determination, the contracting officer must have in his possession or must obtain information sufficient to satisfy himself that the prospective contractor (i) has adequate financial resources, or the ability to obtain such resources, (ii) is able to comply with required delivery schedule, (iii) has a satisfactory record of performance, (iv) has a satisfactory record of integrity, and (v) is otherwise qualified and eligible to receive an award under appropriate laws and regulations. If such information is not in the contracting officer's possession, it is obtained through a preaward survey conducted by the contract administration office responsible for the plant and/or the geographic area in which the plant is located. The necessary data is collected by contract administration personnel from available data or through plant visits, phone calls, and correspondence and entered on Standard Forms 1403, 1404, 1405, 1406, 1407, and 1408 in detail commensurate with the dollar value and complexity of the procurement. The information is used by Federal contracting officers to determine whether a prospective contractor is responsible.

DEPARTMENT OF DEFENSE**Department of the Air Force****Notice of Intent To Perform an Environmental Analysis for the Proposed Beddown of the Global Hawk Remote Operated Aircraft System**

The United States Air Force will conduct an environmental analysis to determine the potential environmental impacts of bedding down the unmanned aerial vehicle, Global Hawk, at a main operating base (MOB). This proposal involves locating up to 60 high altitude endurance unmanned aerial vehicles, associated equipment and up to approximately 800 personnel at an Air Force base within the continental United States. The beddown will start with an initial cadre of four to six aircraft the first year, building to the total number with a delivery schedule of two to four aircraft per year. The proposal includes construction of support facilities and use of airspace in the local region. The Federal Aviation Administration has been invited to participate as a cooperating agency in this environmental analysis.

Five Air Force bases are being considered as potential beddown

locations: (1) Edwards Air Force Base (AFB), California; (2) Beale AFB, California; (3) Tinker AFB, Oklahoma; (4) Ellsworth AFB, South Dakota; and (5) Wright-Patterson AFB, Ohio. In addition, the Air Force will analyze the no-action alternative, which considers potential environmental impacts should the Air Force decide not to beddown the Global Hawk System.

The Air Force will conduct a series of scoping meetings to solicit public input concerning the proposal. The scoping process will help identify issues to be addressed in the environmental analysis. In addition to the comments received at the scoping meetings, written comments on the scope of the environmental analysis will be accepted by the Air Force at the address below through June 30, 2000. The Air Force will accept appropriate comments at any time during the environmental analysis process.

If during the preparation of the environmental analysis, it is determined that an Environmental Impact Statement (EIS) is warranted, comments received during this scoping period will be considered in the EIS preparation.

Scoping meetings will be held at the following locations:

Wright Patterson AFB, OH: June 19, 6:00 p.m. Fairborn High School, 900 E. Dayton-Yellow Springs Road, Fairborn, OH 45324, Cafeteria
