

**Comment Requested**

This notice of intent initiates the scoping process which guides the development of the environmental impact statement.

Early Notice of Importance of Public Participation in Subsequent Environmental Review: A draft environmental impact statement will be prepared for comment. The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Comments received, including the names and addresses of those who comment, will be considered part of the

public record on this proposal and will be available for public inspection.

(Authority: 40 CFR 1501.7 and 1508.22; Forest Service Handbook 1909.15, Section 21)

Dated: May 8, 2008.

**DEPARTMENT OF COMMERCE****Submission for OMB Review;  
Comment Request**

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Agency:* National Oceanic and Atmospheric Administration (NOAA).  
*Title:* Southeast Region Permit Family of Forms.

*Form Number(s):* None.

*OMB Approval Number:* 0648-0205.

*Type of Request:* Regular submission.

*Burden Hours:* 15,671.

*Number of Respondents:* 16,820.

*Average Hours per Response:* The new information is included in a permit form, at no additional burden.

*Needs and Uses:* The participants in the federally-regulated fisheries in the Exclusive Economic Zone of the South Atlantic, Gulf of Mexico, and Caribbean are required to obtain federal permits under the existing permit program for the specific Fishery Management Plans of each region. National Oceanic and Atmospheric Administration, National Marine Fisheries Service (NOAA Fisheries Service) needs information from the applications and associated data collections to identify fishing vessels/dealers/participants, properly manage the fisheries, and generate fishery-specific data.

Additional information to be collected is crew size and percentage of ownership. The need to collect percentage of ownership in a corporation from permit holders is necessary information for the red snapper Individual Fishing Quota (IFQ) program. The IFQ program has a cap on share percent ownership of six percent. Without the ability to track corporate shareholder information, NOAA Fisheries Service will be unable to enforce this share ownership cap. The crew size information is being collected to better understand the nature of the fishery and the number of participants who are not permit holders.

*Affected Public:* Business or other for-profit organizations.

*Frequency:* Annually and on occasion.

*Respondent's Obligation:* Mandatory.

*OMB Desk Officer:* David Rostker,  
(202) 395-3897.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at [dHynek@doc.gov](mailto:dHynek@doc.gov)).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to David Rostker, OMB Desk Officer, FAX number (202) 395-7285, or [David\\_Rostker@omb.eop.gov](mailto:David_Rostker@omb.eop.gov).

Dated: May 12, 2008.

**DEPARTMENT OF COMMERCE****Submission for OMB Review;  
Comment Request**

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Agency:* National Oceanic and Atmospheric Administration (NOAA).

*Title:* Southeast Region Gulf of Mexico Red Snapper IFQ Program.

*OMB Approval Number:* 0648-0551.

*Form Number(s):* None.

*Type of Request:* Regular submission.

*Burden Hours:* 1,038 total (24 from revision).

*Number of Respondents:* 1,417.

*Average Hours per Response:* 1 minute.

*Needs and Uses:* The National Oceanic and Atmospheric Administration, National Marine Fisheries Service (NOAA Fisheries Service) manages the red snapper fishery in the waters of the Gulf of Mexico under the Reef Fish Fishery Management Plan (FMP). The Individual Fishing Quota (IFQ) program was implemented to reduce the overcapacity in the fishery and end the derby fishing conditions that resulted from that overcapitalization. As part of this program, the Southeast Regional Office needs to collect percentage of
