under other certification bodies. CleanSpace is not pursuing MSHA approval.

- (d) The CleanSpace EX's design allows the miners to wear their standard head protection, including cap lamps.
- (e) The CleanSpace EX has been tested and approved as IS under many internationally recognized testing standards. The CleanSpace EX was designed to and is approved pursuant to ATEX "Equipment or Protective System Intended for use in Potentially Explosive Atmospheres Directive 2014/ 34/EU" and is approved to be marked "I Ml Ex ia I Ma, II 2 G Ex ib IIB T4 Gb, - 20°C <Ta<40°C." Additionally, the CleanSpace EX was designed and is approved as IS pursuant to the IEC Certification Scheme for Explosive Atmospheres (IECEX) and is approved to be marked "Ex ia I Ma, Ex ib IIB T4 Gb. IECEx TSA 13.0024X.'
- (f) The scientific literature includes peer-reviewed papers, which suggest that there is an equivalent level of safety for miners when IS equipment is approved by either the ACRI2001 standard or relevant international standards.
- (g) The CleanSpace EX was tested to standards that are equivalent to the MSHA ACRI2001 criteria. The CleanSpace EX has been subjected to extensive testing requirements under several North American and International Standards which all available scientific literature and studies have concluded are as effective as testing and approval under MSHA's ACRI2001 criteria.
- (h) All available information supports a determination that use of the CleanSpace EX in the Genesis Alkali @ WESTVACO mine will achieve the same result as the standard.

The petitioner proposes the following alternative method:

- (a) The petitioner requests the use of the CleanSpace EX, which is not MSHA approved, in this mine in areas in or beyond the last open crosscut and in areas where methane may enter the air
- (b) Affected mine employees will be trained in the proper use and care of the CleanSpace EX in accordance with the manufacturer's recommendations. Task Training and annual refresher training will be documented using MSHA form 5000–23.

The petitioner asserts that the alternate method proposed will at all times guarantee no less than the same measure of protection afforded the miners under the mandatory standard.
