

allow EPA and FDA to make informed decisions on the amount of CFC to be nominated by the U.S. Government for the years 2008 and 2009. Third, all new drug application (NDA) holders for CFC MDI products produced in the United States must submit a complete application for essential use allowances either on their own or in conjunction with their contract filler. In the case where a contract filler produces a portion of an NDA holder's CFC MDIs, the contract filler and the NDA holder must determine the total amount of CFCs necessary to produce the NDA holder's entire product line of CFC MDIs. The NDA holder must provide an estimate of how the CFCs would be split between the contract filler and the NDA holder in the allocation year. This estimate will be used only as a basis for determining the nomination amount, and may be adjusted prior to allocation of essential use allowances. Since the U.S. Government does not forward incomplete or inadequate nominations to the Ozone Secretariat, it is important for applicants to provide all information requested in the Handbook, including the information specified in the supplemental research and development form (page 46).

The accounting framework matrix in the Handbook (Table IV) entitled, "Reporting Accounting Framework for Essential Uses Other Than Laboratory and Analytical Applications" requests data for the year 2006 on the amount of ODS exempted for an essential use, the amount acquired by production, the amount acquired by import and the country(s) of manufacture, the amount on hand at the start of the year, the amount available for use in 2006, the amount used for the essential use, the quantity contained in exported products, the amount destroyed, and the amount on hand at the end of 2006. Because all data necessary for applicants to complete Table IV will not be available until after January 1, 2007, companies should not include this chart with their essential use applications in response to this notice. Instead, companies should provide the required data as specified at 40 CFR 82.13(u)(2). To assist companies in reporting this data, EPA will provide MDI manufacturers with a template to use. EPA will then compile companies' responses to complete the U.S. Accounting Framework for Essential Uses for submission to the Parties to the Montreal Protocol by the end of January 2007. EPA may also request additional information from companies to support its nomination using its information

gathering authority under Section 114 of the Act.

EPA anticipates that the Parties' review of MDI essential use requests will focus extensively on the United States's progress in phasing out CFC MDIs, including education programs to inform patients and health care providers of the CFC phaseout and the transition to alternatives, particularly in the case of albuterol MDIs where a phaseout date has been set by FDA. Accordingly, applicants are strongly advised to present detailed information on these points, including the scope and cost of such efforts and the medical and patient organizations involved in the work. Applicants should submit their exemption requests to EPA as noted in the **ADDRESSES** section above.

SUPPLEMENTARY INFORMATION: This system of records is used to maintain a Governmentwide system that identifies individuals and businesses that have been excluded from participating in Federal procurement and nonprocurement programs throughout the Government. The purpose of these exclusions is to prevent the Federal government from conducting business with nonresponsible contractors and to protect the integrity of the Government's procurement activities.

Dated: November 28, 2006.
