Title: NESHAP for Halogenated Solvent Cleaners/Halogenated Hazardous Air Pollutants (Renewal)

ICR Numbers: EPA ICR Number 1652.08, OMB Control Number 2060-0273

ICR Status: This ICR is scheduled to expire on June 30, 2013. Under OMB regulations, the Agency may continue to either conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart T.

Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Respondents/Affected Entities: Halogenated solvent cleaners.

Estimated Number of Respondents: 1,431.

Frequency of Response: Initially, occasionally, quarterly, semiannually, and annually.

Estimated Total Annual Hour Burden: 45,242.

Estimated Total Annual Cost: \$5,395,561, which includes \$4,380,761 in labor costs, no capital/startup costs, and \$1,014,800 in operation and maintenance (O&M) costs.

Changes in the Estimates: There is an apparent increase in burden hours for the respondent and the Agency as compared to the previous ICR due to burden calculation revisions. The calculations presented in the previous ICR assumed that total respondent hours per year associated with each burden item included technical, managerial, and clerical labor. The previous ICR calculated technical, managerial, and clerical labor hours as being 85, 5, and 10 percent, respectively, of the total hours. To be consistent with the estimation methodology used in other ICRs, this ICR considers total respondent hours to include only technical labor, and that managerial and clerical hours account for an additional 5 and 10 percent, respectively, of those technical labor hours. Additionally, there is an adjustment increase in the respondent labor estimates associated with semiannual and quarterly reporting. The previous ICR estimated labor burdens for one semiannual report and three quarterly reports per year. We have revised the calculations to account

for the burden associated with two semiannual and four quarterly reports per year.

Abstract: The affected entities are subject to the General Provisions of the NESHP at 40 CFR part 63, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 63, subpart HH. Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities: Oil and natural gas production facilities.

Respondent's obligation to respond: mandatory (40 CFR part 63, subpart HH).

Estimated number of respondents: 3,735 (total).

Frequency of response: Initially, annually, and semiannually.

Total estimated burden: 46,642 hours (per year). “Burden” is defined at 5 CFR 1320.3(b).

Total estimated cost: \$5,431,638 (per year), which includes \$910,733 annualized capital or operation & maintenance costs.

Changes in the Estimates: This ICR combines the requirements from the existing regulations and the 2012 amendment, which are EPA ICR Numbers 1788.09 and 2440.02,

respectively. The 2012 rule amended title 40, chapter I, part 63 subpart HH to include emission sources for which standards were not previously developed. This results in an increase in the number of affected major sources. The amendment did not affect the number of area sources.

Several changes were made to this ICR: (1) A correction in the estimated number of respondents based on recent data obtained during development of the 2012 rule amendment; (2) Inclusion of requirements associated with the 2012 amendment, including affirmative defense; and (3) Update to labor rates used in calculating burden estimates. The changes result in an overall decrease in the labor hours and costs and an increase in the total capital and O&M costs as currently identified in the OMB Inventory of Approved Burdens. The current OMB Inventory adds the burden from EPA ICR Numbers 1788.09 and 2440.02, double-counting the burden associated with several requirements. This ICR has been updated to remove any duplicates and to reflect the revised standard correctly.

Director, Collection Strategies Division.
