

BLM's submission of the information collection requests to OMB.

The following information is provided for the information collection:

Title: Tramroads and Logging Roads (43 CFR part 2810).

Form: Form OR 2812–6, Report of Road Use.

OMB Control Number: 1004–0168.

Summary: This collection of information pertains to rights-of-way on public lands that were returned to the United States after being conveyed for construction of the Oregon & California Railroad. On these lands in western Oregon, the BLM Oregon State Office has authority under the Act of August 28, 1937 (43 U.S.C. 1181a and 1181b) and Subchapter V of the Federal Land Policy and Management Act (43 U.S.C. 1761–1771) to grant rights-of-way to private landowners to transport their timber over BLM-controlled roads. Each right-of-way permit issued under these two authorities requires the permittee to provide the BLM with a certified statement disclosing the amount of timber removed, the lands from which the timber was removed, and the BLM roads used to transport the timber. Permittees must submit this information on a quarterly basis using Form OR 2812–6, Report of Road Use.

The BLM uses this information to calculate road use fees, as authorized at Section 502 the Federal Land Policy and Management Act (43 U.S.C. 1762). If we did not require the collection of information, it would not be possible to monitor compliance with the terms and conditions of the permits described above, and road costs would not be collected in a timely manner.

Frequency of Collection: Quarterly.

Estimated Number and Description of Respondents: Approximately 68 holders of rights-of-way for use of BLM-controlled roads in western Oregon.

Currently Approved Reporting and Recordkeeping "Hour" Burden: The currently approved annual reporting burden is 272 responses and 2,176 hours.

Currently Approved Reporting and Recordkeeping "Non-Hour Cost" Burden: \$0.

The Paperwork Reduction Act (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

The BLM will summarize all responses to this notice and include them in the request for OMB approval. All comments will become a matter of public record. Before including your

address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Jean Sonneman,

Acting Information Collection Clearance Officer.

SUPPLEMENTARY INFORMATION:

Background

The 7,021-acre Modoc National Wildlife Refuge is located southeast of Alturas, California. The Refuge was established in 1960 under the Migratory Bird Conservation Act (16 U.S.C. 715d) and the Refuge Recreation Act (16 U.S.C. 460k–460 K.4). Lands within the Refuge have been set aside for use as an inviolate sanctuary, and other management purposes, for migratory birds, for incidental fish and wildlife-oriented recreational development, for the protection of natural resources, and for the conservation of endangered species or threatened species.

Located near the confluence of the north and south forks of the Pit River, the Refuge conserves, protects, and manages a mosaic of freshwater lakes and ponds, seasonal wetlands, irrigated meadows, grasslands, and sagebrush/juniper upland habitats. These habitats provide important resting, feeding, and nesting areas for ducks, geese, and other migratory birds, including the greater sandhill crane.

We announce our decision and the availability of the FONSI for the final CCP in accordance with National Environmental Policy Act (NEPA) (40 CFR 1506.6(b)) requirements. We completed a thorough analysis of impacts on the human environment, which we included in the EA that accompanied the draft CCP.

The National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd–668ee) (Administration Act), as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to provide refuge managers with a 15-year plan for achieving refuge purposes and contributing toward the mission of the National Wildlife Refuge System, consistent with sound principles of fish and wildlife management, conservation, legal mandates, and our policies. In addition to outlining broad management direction on conserving wildlife and their habitats, CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and

interpretation. We will review and update the CCP at least every 15 years in accordance with the Administration Act.

Our Draft CCP and Environmental Assessment (EA) were available for a 45-day public review and comment period, which we announced via several methods, including press releases, updates to constituents, and a **Federal Register** notice (74 FR 28271, June 15, 2009). The Draft CCP/EA identified and evaluated four alternatives for managing the Refuge for the next 15 years. Alternative A was the no-action alternative, which described current Refuge management activities. Alternative B placed greater emphasis on biological resources than on visitor services. Alternative C (the selected alternative) provided an optimal balance of improved biological resource objectives and expanded visitor services

opportunities. Alternative D placed greater emphasis on visitor services than on biological resources.

We received 82 comment letters on the Draft CCP and EA during the review period. We incorporated these received comments into the CCP when possible, and we responded to the comments in an appendix to the CCP. In the FONSI, we selected Alternative C, the basis for the CCP, for implementation. The FONSI documents our decision and is based on the information and analysis contained in the EA.

Under the selected alternative, the Refuges will achieve an optimal balance of biological resource objectives and visitor services opportunities. Habitat management and associated biological resource monitoring will be improved. Visitor service opportunities will focus on quality wildlife-dependent recreation distributed throughout the Refuge.

Waterskiing on the Refuge-owned portion of Dorris Reservoir will be prohibited. In addition, environmental education, interpretation, wildlife observation, photography, fishing, and hunting programs will be improved and/or expanded.

The selected alternative best meets the Refuge's purposes, vision, and goals; contributes to the Refuge System mission; addresses the significant issues and relevant mandates; and is consistent with principles of sound fish and wildlife management.
