Gulf of America Name Change

AGENCY: National Marine Fisheries Service (NMFS) and National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Final rule.

SUMMARY: NMFS and NOS are amending their regulations to change the name of the “Gulf of Mexico” to the “Gulf of America,” consistent with a Presidential directive issued through Executive Order. The intended effect of this rule is to ensure consistency with the Executive Order and to provide clarity for the regulated and general public moving forward regarding the Gulf of America name change.

DATES: This final rule is effective August 7, 2025.

FOR FURTHER INFORMATION CONTACT: For information about this document, call or email Ms. Jenni Wallace, NOAA Fisheries; telephone (301) 427–8544, email jenni.wallace@noaa.gov.

SUPPLEMENTARY INFORMATION: President Donald J. Trump issued Executive Order (E.O.) 14172, titled “Restoring Names That Honor American Greatness” (90 FR 8629) on January 20, 2025. E.O. 14172 directed that the area formerly known as the Gulf of Mexico be renamed as the Gulf of America.

The purpose of this rule is to update the NMFS and NOS regulations in the Code of Federal Regulations (CFR) to reflect the renaming. Specifically, this rule changes all “Gulf of Mexico”

references to “Gulf of America” and makes other consistency edits in existing regulations promulgated under the Coastal Zone Management Act (CZMA) (15 CFR parts 921, 923), National Marine Sanctuaries Act (15 CFR part 922), Marine Mammal Protection Act (50 CFR parts 217, 218, 229), Endangered Species Act (50 CFR parts 222–224, 226), Magnuson-Stevens Fishery Conservation and Management Act (MSA) (50 CFR parts 300, 600, 622, 635), and Atlantic Coastal Fisheries Cooperative Management Act (50 CFR part 697). The text of some statutes, such as the MSA and CZMA, contains explicit references to the “Gulf of Mexico.” In those cases, “Gulf of America” references in agency regulations mean the same geographic area as the “Gulf of Mexico,” as that term is used in the relevant statute. Note that the agency can make nomenclature changes in its regulations consistent with law, but cannot modify the text of statutes enacted by Congress.

This rule replaces the term “Gulf of Mexico” with “Gulf of America” where it appears in the above-referenced regulations. This change is consistent with E.O. 14172, and the name used by the Geographic Names Information System, which maintains standardized geographic names for Federal use. Under this rule, the name change in NMFS and NOS regulations does not result in any changes to, and has no effect on, the applicability or enforceability of the regulations. This rule will have no cost or substantive impact on the public, but will make consistent regulatory references to reflect the renamed Gulf of America.

In addition, for streamlining purposes, this rule removes 15 CFR part 922, subpart L, Appendix B, “Flower Garden Banks National Marine Sanctuary—Terms of Designation.” The terms of designation for a national marine sanctuary are not required to be in the CFR, and removal of the appendix does not change the terms of designation for Flower Garden Banks National Marine Sanctuary.

Classification

NOAA is issuing this rule pursuant to 16 U.S.C. 1855(d) of the Magnuson-Stevens Act (MSA), 16 U.S.C. 1382(a) of the Marine Mammal Protection Act (MMPA), 16 U.S.C. 1540(f) of the Endangered Species Act (ESA), 16

U.S.C. 5103(b) of the Atlantic Coastal Fisheries Cooperative Management Act (ACA), 16 U.S.C. 1439 of the National Marine Sanctuaries Act (NMSA), and 16 U.S.C. 1463 of the Coastal Zone Management Act (CZMA). The reason for using these general rulemaking authorities is that the rule makes nomenclature changes and related edits and does not substantively change regulations previously issued under the MSA, MMPA, ESA, ACA, NMSA, and CZMA. The Chief of Staff, exercising the Delegated Authority of the Under Secretary of Commerce for Oceans and Atmosphere and NOAA Administrator, has determined that this final rule is consistent with the MSA, MMPA, ESA, ACA, NMSA, and CZMA, regulations issued pursuant to those statutes, and other applicable law.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

This final rule is not an Executive Order 14192 regulatory action because this action is not significant under Executive Order 12866.

This final rule contains no new information collection requirements under the Paperwork Reduction Act of 1995.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment are unnecessary.

Consistent with E.O. 14172, this final rule updates the name of Gulf of America in NMFS and NOS regulations and makes other related edits. This rule does not substantively change existing regulations and has no effect on the applicability or enforceability of the regulations. In addition, for streamlining purposes, this rule removes an appendix containing terms of designation for a national marine sanctuary. The terms of designation are not changed and are not required to be in the CFR. For the same reasons described above, there is good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effective date. It is unnecessary to provide time for the regulated community to adjust to this rule, as the rule makes no substantive changes to regulations with which they must already comply.

Because prior notice and opportunity for public comment are not required for this rule by 5 U.S.C. 553, or any other law, the analytical requirements of the

Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, are inapplicable.

NOAA has determined that this action would not have a substantial direct effect on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes; therefore, consultation with Tribal officials under E.O. 13175 is not required, and the requirements of sections (5)(b) and (5)(c) of E.O. 13175 also do not apply. A tribal summary impact statement under section (5)(b)(2)(B) and section (5)(c)(2)(B) of E.O. 13175 is not required and has not been prepared.

Air Plan Approval; Wyoming; Revisions to Regional Haze State Implementation Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a State Implementation Plan (SIP) revision submitted by the State of Wyoming on December 30, 2022, and supplemented on August 31, 2023, and November 16, 2023, addressing regional haze for Jim Bridger Units 1 and 2 (Wyoming 2022 SIP revision). Wyoming’s 2022 SIP revision provides oxides of nitrogen (NO_x) emission and heat input limits that collectively allow for identical reasonable progress as part of the long term strategy during the first implementation period as the associated emission limits in the existing SIP for Jim Bridger Units 1 and 2. The EPA is also approving monthly and annual NO_x and sulfur dioxide (SO₂) emission limits for Jim Bridger Units 1 through 4 that were included in Wyoming’s 2022 SIP revision. The EPA is taking this

action pursuant to the Clean Air Act (CAA or the Act).

DATES: This rule is effective on September 8, 2025.

I. What is being addressed in this document?

The EPA is approving Wyoming’s 2022 SIP revision addressing regional haze long term strategy for the first implementation period at Jim Bridger Units 1 and 2. As required by section 169A of the CAA, the regional haze rule (RHR) calls for state and federal agencies to work together to improve visibility in 156 national parks and wilderness areas, known as mandatory Class I Federal areas.¹ The rule requires the states, in coordination with the EPA, the National Park Service (NPS), the Fish and Wildlife Service, the Forest Service, and other interested parties, to develop and implement air quality protection plans to reduce the pollution that causes visibility impairment in mandatory Class I Federal areas. Visibility impairing pollutants include fine and coarse particulate matter (PM) (e.g., sulfates, nitrates, organic carbon, elemental carbon, and soil dust) and their precursors (e.g., SO₂, NO_x, and, in some cases, volatile organic compounds (VOC) and ammonia (NH₃)). As discussed in further detail in our proposed rule, this document, and the accompanying Response to Comments

(RTC) document, the EPA finds that Wyoming submitted a regional haze SIP revision addressing long term strategy at Jim Bridger Units 1 and 2 that meets the regional haze requirements for the first implementation period. The State’s submission, the proposed rule, and the RTC document can be found in the docket for this action.

II. Background

On December 30, 2022, Wyoming submitted a revision to its SIP to address regional haze for the first implementation period for Jim Bridger, Units 1 through 4 in accordance with the requirements of the CAA’s regional haze program established by CAA sections 169A and 169B and 40 CFR 51.308.²

On April 10, 2024, the EPA proposed to approve Wyoming’s 2022 SIP revision which will replace the previously approved NO_x emission limit of 0.07 pounds per million British Thermal Units (lb/MMBtu) (30-day rolling average) at Jim Bridger Units 1 and 2 for Wyoming’s regional haze long-term strategy.³ Specifically, the Wyoming 2022 SIP revision amends the State’s previously approved long-term strategy for the first regional haze implementation period and requires Jim Bridger Units 1 and 2 to meet NO_x emission limits of 0.12 lb/MMBtu (30-day rolling average) and annual NO_x limits of 1,314 tons/year for each unit, and a heat input limit of 21,900,000 MMBtu/year per unit by January 1, 2024. Ultimately, the Wyoming 2022 SIP revision finds the modified NO_x emission and heat input limits to be sufficient for reasonable progress as part of the long-term strategy during the first implementation period in lieu of the existing emission limits associated with the installation of SCR controls approved and codified by EPA at 40 CFR 52.2636(c)(1).⁴ Wyoming also included in Wyoming’s 2022 SIP revision NO_x and SO₂ monthly and annual emission limits for Jim Bridger Units 1–4. The Wyoming 2022 SIP revision reflects changes to Chapters 7 and 8 of Wyoming’s regional haze SIP narrative⁵ and incorporates certain conditions of Wyoming air quality permits #P0025809 and #P0036941.
