the area's wetlands and watersheds that form the historic headwaters for the river. These areas include Jonathan Dickinson State Park, Pal Mar East/Cypress Creek, Dupuis Wildlife and Environmental Management Areas, J.W. Corbett Wildlife Management Area, Grassy Waters Preserve, Loxahatchee Slough, the last remaining riverine cypress stands in Southeast Florida in the Loxahatchee River, and the Loxahatchee River Estuary.

- c. Proposed Solution and Forecast Completion Date. The LRWRP seeks to address these goals by developing alternatives that will capture, store, and redistribute water currently lost to tide; rehydrate headwater natural areas that have been hydrologically impacted by excessive draining and water diversions; reduce peak discharges to the project's estuarine systems; improve timing and distribution of water from the upstream watershed to increase the resiliency of freshwater riverine habitats to future sea-level changes; and reestablish connections among natural areas. If implemented, these actions will help restore more natural water deliveries, promote improved health and functionality of wetland and upland areas, and increase the quantity and quality of habitat available for native wildlife and vegetation.
- d. *Prior EAs, EISs.* An EIS was prepared in 1999 associated with the Comprehensive Everglades Restoration Plan that proposed 68 project component modifications of the Central and Southern Florida Project.
- e. Alternatives. A reevaluation of alternatives that include the following management measures will be pursued—
- 1. Spreader Canals, Flowways—Shallow canals to distribute and improve water delivery and connectivity of flow.
- 2. Spill Ways, Weirs, and Gravity Structures—to deliver allow water to move as specific depths.
- 3. Pump Stations—New Pump Stations to distribute and improve water delivery.
- 4. Backfill or plugging of canals— Internal drainage and routing features in the system would be plugged, partially or completely backfilled to improve surface water distribution and eliminate drainage.
- 5. Removal of levees and berms— Levees or berms would be degraded or removed to allow water to sheetflow freely.
- 6. Bridges and Culverts—Structures to be used to allow water flows through existing barriers in the systems.
- 7. Storage Features—Shallow, intermediate and deep water reservoirs,

- flow equalization basins and aquifer storage and recovery for capturing, holding and delivering both normal and peak flows and discharging when water required.
- 8. Operational Changes—Adjustments to operational criteria to improve timing and distribution of flow.
- 9. Non-Structural Solutions— Management measures that can address project goals and objectives without physical structural modifications to the managed/natural system. For example, leasing and/or purchasing land acquisition rights to maintain undeveloped natural areas adaptation zones above high tide to promote ecosystem adaptations to climate change.

Alternatives will also include the No Action alternative.

- f. Issues. The effects on Federally listed threatened and endangered species, essential fish habitat, cultural resources, water supply, and flood damage risk reduction will be analyzed. Additionally, health and safety, water quality, aesthetics and recreation, fish and wildlife resources, energy conservation, socio-economic resources, and other impacts identified through scoping, public involvement, and interagency coordination will be discussed.
- g. Scoping Process. A scoping meeting is scheduled for 12-Jan-2014 from 6:00—8:00 p.m. at: Indian River State College, Chastain Campus, 2400 Southeast Salerno Road, Stuart, FL 34997. The public will be involved in the planning process through mail solicitations and public notices listed on the following Web site—http://www.saj.usace.army.mil/Missions/Environmental/Ecosystem Restoration/LoxahatcheeRiver WatershedRestorationProject.aspx.
- h. *Public Involvement*. We invite the participation of affected Federal, state and local agencies, Tribes, and other interested private organizations and parties.
- i. Coordination. The proposed action is being coordinated with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service (NMFS) under section 7 of the Endangered Species Act, with the NMFS concerning Essential Fish Habitat and with the State Historic Preservation Officer.
- j. Other Environmental Review and Consultation. The proposed action would involve evaluation for compliance with guidelines pursuant to section 404(b) of the Clean Water Act; application (to the State of Florida) for Water Quality Certification pursuant to section 401 of the Clean Water Act; certification of state lands, easements, and rights of way; and determination of

Coastal Zone Management Act consistency.

- k. Agency Role. The Corps and the non-Federal sponsor, South Florida Water Management District, will provide extensive information and assistance on the resources to be improved and those that would be impacted, mitigation measures, and alternatives.
- l. NEPA Assessment Preparation. It is estimated that the NEPA Assessment will be available to the public on or about August 2016.

Dated: December 23, 2014.

## ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPP-2014-0479; FRL-9916-07]

Agency Information Collection Activities; Proposed Collection; Comment Request Reporting in the FIFRA Cooperative Agreement Work Plan and Report Template OMB Control No. 2070–NEW

Correction

In notice document 2014–30685 appearing on pages 40 through 41 in the issue of Friday, January 2, 2015, make the following correction:

1. On page 40, in the third column, in the **DATES** section, "March 3, 2014" should read "March 3, 2015"

[FR Doc. C1–2014–30685 Filed 1–7–15; 8:45 am] BILLING CODE 1501–01–D

# EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

#### Sunshine Act Meeting

**AGENCY:** Equal Employment Opportunity Commission.

**DATE AND TIME:** Wednesday, January 14, 2015, 9:30 a.m. Eastern Time.

**PLACE:** Commission Meeting Room on the First Floor of the EEOC Office Building, 131 "M" Street NE., Washington, DC 20507.

**STATUS:** The meeting will be open to the public.

## MATTERS TO BE CONSIDERED:

### **Open Session**

- 1. Announcement of Notation Votes, and
- 2. Preventing and Addressing Workplace Harassment.
