

regarding potential environmental and socioeconomic impacts associated with each alternative. As such, the scope of this PEA is broad and encompasses activities to support ABCT stationing and planning for facilities projected to be required from fiscal years 2018 to 2021. The programmatic approach is designed to allow for early planning, coordination, and flexibility throughout implementation of the Army's process of stationing an ABCT.

Implementation of the proposed action would require unit stationing (e.g., realignment or inactivation), garrison construction and demolition, live-fire training, and maneuver training. The proposed action and alternatives do not propose or require land expansion or acquisition.

Adverse impacts were anticipated to be less than significant for air quality and greenhouse gas, biological resources, cultural resources, soils, traffic and transportation, surface waters, and wetlands. Negligible adverse effects were anticipated for land use, noise, geology, groundwater, floodplains, airspace, facilities, energy demand and generation, utilities, hazardous materials, hazardous waste, and human health and safety. Socioeconomic impacts for Fort Carson were anticipated to be negligible under Alternative 1 and moderately adverse under Alternatives 2 through 5. Socioeconomic impacts for Fort Bliss, Fort Hood, Fort Riley, and Fort Stewart were anticipated to be beneficial under the gain-scenario alternative for each installation, with no impacts under the remaining alternatives.

Members of the public, federally-recognized Native American Tribes, and federal, state, and local agencies are invited to submit written comments on the PEA and/or draft FNSI.

The PEA and draft FNSI may be accessed at: <https://aec.army.mil/index.php?CID=352>.
