

In its meeting on April 2, 2020, the Board of Actuaries of the Civil Service Retirement System (the Board) recommended revisions to the long-term economic assumptions and recommended changes to the demographic assumptions used in the actuarial valuations of CSRS and FERS. The economic assumptions have decreased from the previous long-term economic assumptions. The demographic assumptions include assumed rates of mortality, employee withdrawal, retirement, and merit and longevity pay increases. The Board recommended adjustments to demographic assumptions for employee withdrawal rates and annuitant mortality rates for certain categories of employees. OPM has adopted the Board's recommendations.

Section 211 of Title II, Division E of Public Law 116–94, the Further Consolidated Appropriations Act of 2020, provided for separate normal cost percentages for certain members of the Capitol Police as distinct from other Congressional Employees. As a result, OPM published regulations on September 22, 2020, that revised the categories of employees for computation

of normal cost percentages for certain members of the Capitol Police who are covered by the Federal Employees' Retirement System.

With regard to the economic assumptions described under section 841.402 of title 5, Code of Federal Regulations, used in the actuarial valuations of FERS, the Board concluded that it would be appropriate to assume a rate of investment return of 4.0 percent, a reduction of 0.25 percent from the existing rate of 4.25 percent. In addition, the Board determined that the assumed inflation rate should be reduced 0.10 percent from 2.50 percent to 2.40 percent, that the assumed rate of FERS annuitant Cost of Living Adjustments should remain at 80 percent of the assumed rate of inflation, and that the projected rate of General Schedule salary increases should be reduced 0.10 percent from 2.75 percent to 2.65 percent. The general salary increases are in addition to assumed within-grade increases. These assumptions are intended to reflect the long term expected future experience of the Systems.

The demographic assumptions are determined separately for each of a

number of special groups, in cases where separate experience data is available. Based on the demographic and economic assumptions described above, OPM has determined the normal cost percentage for each category of employees under section 841.403 of title 5, Code of Federal Regulations.

Section 5001 of Public Law 112–96, The Middle Class Tax Relief and Jobs Creation Act of 2012, established provisions for FERS Revised Annuity Employees (FERS–RAE). The law permanently increases the retirement contributions by 2.30 percent of pay for these employees. Subsequently, Section 401 of Public Law 113–67, the Bipartisan Budget Act of 2013, created another class of FERS coverage, FERS–Further Revised Annuity Employee (FERS–FRAE). Employees subject to FERS–FRAE must pay an increase of 1.30 percent of pay above the retirement contribution percentage set for FERS–RAE. Separate normal cost percentages apply for employees covered under FERS–RAE and for employees covered under FERS–FRAE.

The normal cost percentages for each category of employee, including the employee contributions, are as follows:

#### NORMAL COST PERCENTAGES FOR FERS, FERS–REVISED ANNUITY EMPLOYEE (RAE), AND FERS–FURTHER REVISED ANNUITY (FRAE) GROUPS
