Federal Energy Regulatory Commission

[Project No. 3211–010]

Power Authority of the State of New York; Notice of Availability of Final Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a new license to continue to operate and maintain the Hinckley (Gregory B. Jarvis) Hydroelectric Project (Jarvis Project). The Jarvis Project is located on West Canada Creek, near the Hamlet of Hinckley in the counties of Oneida and Herkimer, New York.

The final EA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the final EA via the internet through the Commission's Home Page (<http://www.ferc.gov/>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field, to access the document.
