

science assessment (ISA). Comments are solicited from the public on Volume 2, which will also be the subject of a consultation with the CASAC Ozone Panel, to be announced in a separate **Federal Register** notice. This volume identifies policy-relevant issues in the review and describes key considerations in the EPA's development of the ISA. Volume 3, which is not yet completed, is the planning document for quantitative analyses to be considered in the policy assessment (PA), including exposure and risk analyses, as warranted. In order that consideration of the availability of new evidence in the review can inform these plans, the development and public availability of Volume 3 will generally coincide with that of the draft ISA, and it will be the subject of a consultation with the CASAC Ozone Panel at that time. These documents do not represent and should not be construed to represent any final EPA policy, viewpoint, or determination.

As described above, comments on Volume 2 of the IRP should be submitted to the docket by January 21, 2025. A separate **Federal Register** notice will provide details about the CASAC Ozone Panel consultation meeting and the process for public participation in the consultation. The EPA will consider the consultation comments and public comments on the IRP, Volume 2, in preparation of the ISA for O₃ and related photochemical oxidants. Volume 1 of the IRP, also being made available, provides background or contextual and historical material for this NAAQS review.

Director, Health and Environmental Impacts Division.
