RTID 0648–XE334

Atlantic Highly Migratory Species;
Atlantic Bluefin Tuna Fisheries;
Closure of the General Category
October Through November Fishery
for 2024

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS closes the General category fishery for Atlantic bluefin tuna (BFT) for the remainder of the October through November time period. The General category may only retain, possess, or land large medium and giant (*i.e.*, measuring 73 inches (185 centimeters (cm)) curved fork length (CFL) or greater) BFT when the fishery is open. This action applies to Atlantic Tunas General category (commercial) permitted vessels and Atlantic highly migratory species (HMS) Charter/Headboat permitted vessels with a commercial sale endorsement when

fishing commercially for BFT. This action also waives the previously scheduled restricted-fishing days (RFDs) for the remainder of the October through November time period. With the RFDs waived during the closure, fishermen aboard General category permitted vessels and HMS Charter/Headboat permitted vessels may tag and release BFT of all sizes, subject to the requirements of catch-and-release and tag-and-release programs. On December 1, 2024, the fishery will reopen automatically.

DATES: Effective 11:30 p.m., local time, October 24, 2024, through November 30, 2024.

FOR FURTHER INFORMATION CONTACT: Becky Curtis (*becky.curtis@noaa.gov*) and Larry Redd, Jr. (*larry.redd@noaa.gov*) by email or by phone at 301–427–8503.

SUPPLEMENTARY INFORMATION: Atlantic BFT fisheries are managed under the 2006 Consolidated HMS Fishery Management Plan (FMP) and its amendments, pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) and consistent with the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*). HMS implementing regulations are at 50 CFR part 635. Section 635.27(a) divides the U.S. BFT quota, established by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and as implemented by the United States among the various domestic fishing categories, per the allocations established in the 2006 Consolidated HMS FMP and its amendments. NMFS is required under the Magnuson-Stevens

Act at 16 U.S.C. 1854(g)(1)(D) to provide U.S. fishing vessels with a reasonable opportunity to harvest quotas under relevant international fishery agreements such as the ICCAT Convention, which is implemented domestically pursuant to ATCA.

Under § 635.28(a)(1), NMFS files a closure action with the Office of the Federal Register for publication when a BFT quota (or subquota) is reached or is projected to be reached. Retaining, possessing, or landing BFT under that quota category is prohibited on or after the effective date and time of a closure action for that category until the opening of the relevant subsequent quota period or until such date as specified.

As described in § 635.27(a), the current baseline U.S. BFT quota is 1,316.14 metric tons (mt) (not including the 25 mt ICCAT allocated to the United States to account for bycatch of BFT in pelagic longline fisheries in the Northeast Distant Gear Restricted Area per § 635.27(a)(3)). The General category baseline quota is 710.7 mt. The General category baseline quota is suballocated to different time periods. Relevant to this action, the baseline subquota for the October through November time period is 92.4 mt. Effective October 2, 2024, NMFS transferred 100 mt from the Reserve category to the General category October through November time period, resulting in an adjusted October through November time period subquota of 192.4 mt (89 FR 81032, October 7, 2024).

Closure of the October Through November 2024 BFT General Category Fishery

To date, reported landings for the BFT General category October through November time period total 170.9 mt. Based on these landings data, including average daily catch rates, as well as anticipated favorable fishing conditions in the coming days, NMFS has determined that the adjusted October through November time period subquota of 192.4 mt is projected to be reached and exceeded shortly. Therefore, retaining, possessing, or landing large medium or giant (*i.e.*, measuring 73 inches (185 cm) CFL or greater) BFT by persons aboard vessels permitted in the Atlantic Tunas General category and HMS Charter/Headboat permitted vessels (while fishing commercially) must cease at 11:30 p.m. local time on October 24, 2024. The BFT General category will automatically reopen December 1, 2024, for the December time period with a retention limit of one large medium or giant BFT per vessel per day/trip. This action applies to Atlantic Tunas General category (commercial) permitted vessels and HMS Charter/Headboat permitted vessels with a commercial sale endorsement when fishing commercially for BFT and is taken consistent with the regulations at § 635.28(a)(1).

Waiver for Remaining October Through November RFDs

On May 31, 2024 (89 FR 47095), NMFS published a final rule that, among other things, implemented RFDs every Sunday, Tuesday, Friday, and Saturday from July 1 through November 30, 2024. Since the fishery will be closed for the remainder of the October through November time period, NMFS has decided to waive the previously-scheduled RFDs for the remainder of that time period.

With the RFDs waived during a closure, consistent with § 635.23(a)(7), fishermen aboard General category permitted vessels and HMS Charter/Headboat permitted vessels may tag and release BFT of all sizes, subject to the requirements of the catch-and-release and tag-and-release programs described at § 635.26(a). All BFT that are released must be handled in a manner that will maximize their survival, and without removing the fish from the water, consistent with requirements at § 635.21(a)(1). For additional information on safe handling, see the "Careful Catch and Release" brochure available at <https://www.fisheries.noaa.gov/resource/>

[outreach-and-education/careful-catch-and-release-brochure/](#).

Monitoring and Reporting

NMFS will continue to monitor the BFT fisheries closely. Per § 635.5(b)(2)(i)(A), dealers are required to submit landing reports within 24 hours of a dealer receiving BFT. Late reporting by dealers compromises NMFS' ability to timely implement actions such as quota and retention limit adjustments, as well as closures, and may result in enforcement actions. Additionally, and separate from the dealer reporting requirement, General and HMS Charter/Headboat category vessel owners are required per § 635.5(a)(4) to report their own catch of all BFT retained or discarded dead within 24 hours of the landing(s) or end of each trip, by accessing <https://hmspermits.noaa.gov>, using the HMS Catch Reporting app, or calling 888-872-8862 (Monday through Friday from 8 a.m. until 4:30 p.m.).

After the fishery reopens on December 1, depending on the level of fishing effort and catch rates of BFT at that time, NMFS may determine that additional adjustments are necessary to ensure available subquotas are not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas as specified under § 635.27(a)(7). If needed, subsequent adjustments will be published in the **Federal Register**. In addition, fishermen may access <https://hmspermits.noaa.gov>, for updates on quota monitoring and inseason adjustments.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act (16 U.S.C. 1855(d)) and regulations at 50 CFR part 635 and this action is exempt from review under Executive Order 12866.

The Assistant Administrator for NMFS (AA) finds that pursuant to 5 U.S.C. 553(b)(B), it is impracticable and contrary to the public interest to provide prior notice of, and an opportunity for public comment on this action, for the following reasons. Specifically, the regulations implementing the 2006 Consolidated HMS FMP and amendments provide for inseason retention limit adjustments and fishery closures to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Providing for prior notice and an opportunity to comment is impracticable and contrary to the public interest as this fishery is

currently underway and, based on the most recent landings information, the available time period subquota is projected to be reached shortly. Delaying this action could result in BFT landings that exceed the October through November time period subquota, which may result in future potential quota reductions for other BFT categories, depending on the magnitude of a potential overharvest. Taking this action does not raise conservation and management concerns and would support effective management of the BFT fishery. NMFS notes that the public had an opportunity to comment on the underlying rulemakings that established the U.S. BFT quota and the inseason adjustment and closure criteria.

For all of the above reasons, the AA also finds that pursuant to 5 U.S.C. 553(d), there is good cause to waive the 30-day delay in effective date.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: October 23, 2024.

Karen H. Abrams,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Amendment 8 Revisions to Essential Fish Habitat in the Fishery Management Plan for U.S. West Coast Fisheries for Highly Migratory Species

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification of agency decision.

SUMMARY: NMFS announces the approval of amendment 8 to the Fishery Management Plan (FMP) for the U.S. West Coast Highly Migratory Species (HMS). This amendment updates essential fish habitat (EFH) provisions in the existing HMS FMP. This amendment promotes the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) which requires periodic review and revision of EFH components of FMPs as warranted based on available information.

DATES: The amendment was approved on October 21, 2024.
