Public input provided will help inform the development of a management strategy evaluation (MSE) which will evaluate different management strategies designed to minimize discards in the recreational summer flounder fishery. This MSE is part of the Council's continued implementation of its Ecosystem Approach to Fisheries Management (EAFM) structured framework process that will evaluate different management approaches within an ecosystem context to determine if the outcomes associated with the different approaches achieve management goals and objectives. Workshop participants will listen to a

series of short background presentations and will then participate in an MSE workshop to provide input and feedback regarding summer flounder discard concerns, potential management objectives to address these concerns, and performance metrics and strategies to achieve these objectives.

The dates and times of the three webinar workshops are listed below. Individuals are encouraged to participate in the workshop for their region; however, all workshops are open to all individuals.
