

National Survey on Drug Use and Health: Clinical Validation Study of the Substance Dependence and Abuse Measures—(OMB No. 0930–0231)—Revision

The Substance Abuse and Mental Health Services Administration's (SAMHSA) National Survey on Drug Use and Health (NSDUH), formerly the National Household Survey on Drug Abuse, is a survey of the civilian, noninstitutionalized population of the United States 12 years old and older. The data are used to determine the prevalence of use of tobacco products, alcohol, illicit substances, and illicit use of prescription drugs. The results are used by SAMHSA, the Office of National Drug Control Policy, other Federal government agencies, and other organizations and researchers to establish policy, direct program activities, and better allocate resources.

From 2001–2004, the NSDUH conducted the first phase (phase 1) of a two-phase Clinical Validation Study of the Substance Dependence and Abuse Measures. From 2005–2007 the NSDUH plans to conduct the second phase (Phase 2) of this study. Specific aims of the two-phase study are to achieve the best overarching format, and the best wording and ordering for the assessment

questions. The goal is improved validity and reduced respondent burden.

In phase 1 a field test was conducted. Half of all subjects in this field test were between 12 and 17, and half 18 years of age or older; subjects were recruited from the Research Triangle and the Triad areas of North Carolina through fliers and newspaper ads, and asked (1) demographic information and (2) questions from two self-administered sections of the NSDUH questionnaire: questions about the quantity and frequency of use of drugs and alcohol, and questions about symptoms of substance dependence and abuse. A semi-structured clinical interview was administered to these same subjects by a trained clinician to determine the presence or absence of substance dependence and abuse. The clinical instruments used to assess subjects were the substance abuse modules from the Structured Clinical Interview for DSM–IV (SCID) (for adults) and the Kiddie Schedule for Affective Disorders and Schizophrenia (K–SADS) (for those between 12 and 17 years of age). The correspondence of the diagnosis of substance dependence and abuse between the clinical and survey interview were compared.

The results of this comparison from the field test in phase 1 indicated a lack

of sufficient correspondence between the clinical and survey interview. Overall there was a strong tendency toward over reporting in the survey interview. Recommendations were made to revise specific questions. Problems with specific questions were identified and reasons for lack of correspondence were examined. Modifications to the NSDUH questions on substance dependence and abuse to achieve better correspondence are being made for phase 2 of the study. In order to reduce a tendency to over report some questions have been revised to be more specific.

In Phase 2, a second clinical validation study will be conducted using the same procedures as Phase 1 but with the revised questions on dependence or abuse. This will allow a determination of the correspondence (kappa) between the revised diagnosis obtained from the NSDUH substance dependence and abuse module and the diagnosis from the structured clinical interviews. Final revisions to the survey instrument will be made based on findings from Phase 2. All decisions about final revisions to the module will balance the need for correspondence across different groups. The following table summarizes the burden associated with phase two of the project.

Phase II	Number of respondents	Responses per respondent	Hours per response	Total burden
Adults:				
Screening	400	1	.08	32
Screener and interview	200	1	1.5	300
Adolescents:				
Screening	200	1	1.5	300
Screener and interview	170	1	1.50	255
Total	370			887

Information Collection Requests

1. *Title:* Application and Permit to Handle Hazardous Materials.

OMB Control Number: 1625–0005.

Summary: The information sought here ensures the safe handling of explosives and other hazardous materials around ports and aboard vessels.

Need: Title 33 United States Code 1225 authorizes the Coast Guard to establish standards for the handling, storage, and movement of hazardous materials on a vessel and/or waterfront facility. Title 33 Code of Federal Regulations (CFR) 126.17, and 49 CFR 176.100 and 176.415, prescribe the rules for facilities and vessels.

Respondents: Shipping agents and terminal operators that handle hazardous materials.

Frequency: On occasion.

Burden Estimate: The estimated burden is 145 hours a year.

2. *Title:* Security Zones, Regulated Navigation Areas, and Safety Zones.

OMB Control Number: 1625–0020.

Summary: The Coast Guard collects this information only when someone seeks a security zone, regulated navigation area, or safety zone. It uses the information to assess the need to establish one of these areas.

Need: The Coast Guard Captains of the Port (COTPs), under 33 U.S.C. 1226, 50 U.S.C. 191, and 33 CFR parts 6 and 165, are authorized to designate security zones in the U.S. for as long as they are deemed necessary to prevent damage or injury. Title 33 U.S.C. 1223 authorizes the Coast Guard to prescribe rules to control vessel traffic in areas he or she deems hazardous because of reduced visibility, adverse weather, or vessel congestion. Title 33 U.S.C. 1225 authorizes the Coast Guard to establish rules to allow the designation of safety zones where access is limited to authorized persons, vehicles, or vessels to protect the public from hazardous situations.

Respondents: Federal, State, and local government agencies, vessels and facilities.

Frequency: On occasion.

Burden Estimate: The estimated burden is 194 hours a year.

3. *Title:* Self-propelled Liquefied Gas Vessels.

OMB Control Number: 1625–0029.

Summary: We need the information sought here to ensure compliance with our rules for the design and operation of liquefied gas carriers.

Need: Title 46 U.S.C. 3703 and 9101 authorizes the Coast Guard to establish regulations to protect life, property, and the environment from the hazards associated with the carriage of dangerous liquid cargo in bulk. Title 46 CFR part 154 prescribes these rules for the carriage of liquefied gases in bulk on self-propelled vessels by governing the design, construction, equipment, and operation of these vessels and the safety of personnel aboard them.

Respondents: Owners and operators of self-propelled vessels carrying liquefied gas.

Frequency: On occasion.

Burden Estimate: The estimated burden is 5,416 hours a year.

4. *Title:* Plan Approval and Records for Electrical Engineering Regulations—Title 46 CFR Subchapter J.

OMB Control Number: 1625–0031.

Summary: The information sought here is needed to ensure compliance with our rules on electrical engineering for the design and construction of U.S.-flag commercial vessels.

Need: Title 46 U.S.C. 3306 and 3703 authorize the Coast Guard to establish rules to promote the safety of life and property in commercial vessels. The electrical engineering rules appear at 46 CFR Subchapter J (parts 110 to 113).

Respondents: Owners, operators, and builders of vessels.

Frequency: On occasion.

Burden Estimate: The estimated burden is 1,151 hours a year.

5. **Title:** Streamlined Inspection Program.

OMB Control Number: 1625-0085.

Summary: The Coast Guard established an optional Streamlined Inspection Program (SIP) to provide owners and operators of U.S. vessels an alternative method of complying with inspection requirements of the Coast Guard.

Need: Owners and operators of vessels opting to participate in the program will maintain a vessel in compliance with a Company Action Plan (CAP) and Vessel Action Plan (VAP) and have their own personnel periodically perform many of the tests and examinations conducted by marine inspectors of the Coast Guard. The Coast Guard expects that participating vessels will continuously meet a higher level of safety and readiness throughout the inspection cycle.

Respondents: Owners and operators of vessels.

Frequency: On occasion. Application and plan development occur only once at enrollment. Updates and revisions are required to be made every 2 years. The Officer in Charge, Marine Inspection (OCMI) and the company will review the plans every 5 years.

Burden Estimate: The estimated burden is 2,138 hours a year.

6. **Title:** Report of Oil or Hazardous Substance Discharge; and Report of Suspicious Maritime Activity.

OMB Control Number: 1625-0096.

Type of Request: Revision of currently approved collection.

Summary: Any discharge of oil or a hazardous substance must be reported to the National Response Center (NRC) so that the pre-designated on-scene coordinator can be informed and appropriate spill mitigation action carried out. The NRC also receives suspicious maritime activity reports from the public and disseminates the info to appropriate entities.

Need: Titles 33 CFR 153.203, 40 CFR 263.30 and 264.56, and 49 CFR 171.15

mandate that the National Response Center be the central place to report all pollution spills by the public. Title 33 CFR 101.305 mandates that owners or operators of vessels or facilities required to have security plans report suspicious maritime activities that may result in a Transportation Security Incident (TSI) and breaches of security to the National Response Center. Voluntary reports are also accepted.

Respondents: Persons-in-charge of a vessel or an onshore or offshore facility; owners or operators of vessels or facilities required to have security plans; and the public.

Frequency: On occasion.

Burden Estimate: The estimated burden is 9,105 hours a year.

Dated: November 9, 2004.

David McLeish,

Acting Assistant Commandant for Command, Control, Communications, Computers and Information Technology.
