

import) mercury, mercury-added products, and persons who otherwise intentionally use mercury in a manufacturing process.

Estimated average number of potential respondents per year: 756.

Frequency of response: Every three years.

Estimated yearly average number of responses for each respondent: 0.33.

Estimated total annual burden hours: 52,000 hours.

Estimated total annual costs: EPA estimates the annual average industry burden and cost over three years at approximately 17,000 hours and \$1.4 million dollars, respectively, with a total industry burden of approximately 52,000 hours and \$4.2 million over the three-year period. Annual average agency burden and costs annualized over 3 years are 1,600 hours and \$0.15 million, with a total agency burden of approximately 4,800 hours and \$0.4 million over 3 years. Total annual burden and cost for both industry and agency annualized over 3 years is 19,000 hours and \$1.8 million dollars. Total overall burden and costs are 57,000 hours and \$4.6 million.

III. Are there changes in the estimates from the last approval?

In June 2018, EPA finalized a rule to require reporting from persons who manufacture (including import) mercury or mercury-added products, or otherwise intentionally use mercury in a manufacturing process. That rule was challenged in the Second Circuit Court of Appeals by the Natural Resources Defense Council and several state attorneys general in July 2018. The petitioners argued that three exemptions to the reporting requirements violated the statutory mandate within TSCA section 8(b)(10). Oral arguments were held on November 20, 2019 and the court issued its decision in June 5, 2020. The Agency prevailed on two issues, but the Second Circuit vacated an exemption (40 CFR 713.7(b)(2)) for persons who import pre-assembled products that contain a mercury-added component. As a result, such persons are now required to report pursuant to 40 CFR 713.7(b). Additionally, an interim final rule will be used to effectuate the decision of the court, including necessary regulatory amendments.

Based on the numbers of reporters of mercury data to the IMERC Database, as well as EPA's TRI program and CDR rule, there will be a change in manufacturers (including importers) or processors that could respond to this information collection. The annual public burden for this collection of

information is estimated about 23 hours per respondent. This request represents a decrease of 9 hours per respondent from that currently in the OMB inventory, or a total decrease of 20,522 hours (from 72,567 to 52,045 hours). This increase is due to, a decrease in rule familiarization burden, a decrease in form completion burden due to mercury export prohibitions, and changes in the number of estimated respondents.

In addition, OMB has requested that EPA move towards using the 18-question format for ICR Supporting Statements used by other federal agencies and departments and is based on the submission instructions established by OMB in 1995, replacing the alternate format developed by EPA and OMB prior to 1995. EPA intends to update this Supporting Statement during the comment period to reflect the 18-question format, and has included the questions in an attachment to this Supporting Statement. In doing so, the Agency does not expect the change in format to result in substantive changes to the information collection activities or related estimated burden and costs.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through [regulations.gov](https://www.regulations.gov) or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI, and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at <https://www.epa.gov/dockets/commenting-epa-dockets>.

II. Registration Applications

EPA has received applications to register new uses for pesticide products containing currently registered active ingredients. Pursuant to the provisions of FIFRA section 3(c)(4) (7 U.S.C. 136a(c)(4)), EPA is hereby providing
