Title: NESHAP for Aerospace Manufacturing and Rework (Renewal).

ICR Numbers: EPA ICR Number 1687.07, OMB Control Number 2060-0314.

ICR Status: This ICR is scheduled to expire on September 30, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The respondents to the information collection are owners or operators of new, reconstructed, and existing aerospace manufacturing and rework facilities where the total hazardous air pollutants (HAP) emitted are greater than or equal to 10 tons per year of any one HAP; or where the total HAP emitted are greater than or equal to 25 tons per year of any combination of HAP. Operations covered include: Cleaning, primer and top coat application, repainting, chemical milling maskant application, and handling and storage of waste. This information will then be used by enforcement agencies to verify that sources subject to the standard are meeting the emission reductions mandated by the Clean Air Act.

Owners/operators of aerospace manufacturing and rework facilities are required to submit initial notification, performance tests, and periodic reports. Respondents are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Semiannual reports are also

required. These notifications, reports, and records are essential in determining compliance; and are required, in general, of all sources subject to NESHAP.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least five years following the date of such measurements, maintain reports and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart GG as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 259 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Aerospace manufacturing and rework.
Estimated Number of Respondents: 136.

Frequency of Response: Initially, quarterly, semiannually and on occasion.

Estimated Total Annual Hour Burden: 141,018.

Estimated Total Annual Cost: \$12,611,605, which includes \$0 annualized Capital

Startup costs, \$136,000 annualized Operating and Maintenance (O&M) costs, and \$12, 575,605 annualized Labor costs.

Changes in the Estimates: There is an adjustment decrease of 627 hours in the total estimated burden hours as currently identified in the OMB Inventory of Approved Burdens. This decrease is not due to any program changes.

Dated: September 11, 2007.

Acting Director, Collection Strategies Division.
