SUPPLEMENTARY INFORMATION: AECI proposes to construct and operate a nominal 660-megawatt coal-based electric generating facility at one of two sites in northwest Missouri. Its proposed site is just west of Norborne, Missouri, in Carroll County. The alternative site is west of Big Lake Missouri, along the Missouri River and just south of U.S. Highway 159 in Holt County. Fuel will be supplied to the plant at either site by rail; competing rail options will be evaluated. Construction of the project at either site will require the construction of new transmission facilities. Substation upgrades and approximately 135 miles of 345-kV transmission line would be required to connect the new plant to AECI's transmission system. For the proposed Norborne site, one line would go east to the existing Thomas Hill Substation, and one line would go south to Sedalia and then to a new substation in eastern Benton County. For the Holt County site, a double circuit 345-kV line would be required from the plant to the Fairport Substation in DeKalb County and a single circuit 345-kV line from the Fairport Substation to a new substation near Orrick, Missouri, in southwest Ray County. AECI's schedule calls for these facilities to be in commercial operation by May 2011.

Alternatives to be considered by RUS include no action, purchased power, renewable energy sources, distributed generation, and alternative site locations.

Four public scoping meetings in an open-house format followed by a discussion period were held: August 22, 2005, Oregon, Missouri, at T.J. Hall Community Center, 104 S. Main; August 23, 2005, Sedalia, Missouri at Missouri Electric Cooperatives Building, State Fair Grounds, 2503 W. 16th St.; August 24, 2005, Salisbury, Missouri at Knights of Columbus Building, 311 E. Patterson Ave.; August 25, 2005, Norborne, Missouri, at Goppert Community Building, 201 S. Pine.

RUS will use input provided by government agencies, private organizations, and the public in the preparation of a Draft EIS. The Draft EIS will be available for review and comment for 45 days. A Final EIS will

then be prepared that considers all comments received. The Final EIS will be available for review and comment for 30 days. Following the 30-day comment period, RUS will prepare a Record of Decision (ROD). Notices announcing the availability of the Draft and Final EIS and the ROD will be published in the **Federal Register** and in local newspapers.

Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant Federal, State and local environmental laws and regulations and completion of the environmental review requirements as prescribed in the RUS Environmental Policies and Procedures (7 CFR Part 1794).

Dated: September 23, 2005.
