The nonstandard fees will consist of two components, length and cube. The length component will consist of two fees, one fee for a piece that measures more than 22 inches up to 30 inches, and another fee for a piece that measures more than 30 inches in length. The cube component will consist of a fee for a piece that measures more than 2 cubic feet (3,456 cubic inches). Cube dimensions for rectangular pieces are determined by measuring the length, width, and height in inches (rounding off each measurement to the nearest whole inch) and multiplying the length by the width by the height. For nonrectangular pieces, calculate as stated above and multiply the result by an adjustment factor of 0.785. If either calculation exceeds 3,456 cubic inches, the piece is subject to the cube dimension nonstandard fee.

A piece may be subject to both a length and a cube dimension nonstandard fee. The nonstandard fees do not apply to Flat Rate products, Regional Rate products or returns (USPS Returns, PRS).

In addition, commercial Priority Mail Express and Priority Mail, and Parcel Select (Destination Entry, Ground, PSLW) will require the Shipping Services file manifests or other approved electronic documentation include the accurate dimensions

(length, width, height) of all pieces that exceed 22 inches.

* * * * *

Dimension Noncompliance Fee

The Postal Service is implementing a dimension noncompliance fee for commercial Priority Mail Express and Priority Mail, and Parcel Select (Destination Entry, Ground, PSLW, and USPS Connect Local) mailpieces. The dimension noncompliance fee will be assessed when dimensions (length, width, height) required by standard to be included in the Shipping Services file manifests or other approved electronic documentation, are omitted or are inaccurate. A mailpiece is only subject to one dimension noncompliance fee.
