

number of responses per respondent for drugs and devices the increase in biologics reporting resulted in an overall total reporting burden increase from 5,985 to 7,890.

In table 2 we separated each center's recordkeeping to ensure consistency with table 1 and to accurately capture each center's burden estimates. The average No. of Records Per Recordkeeper increased from 4.12 to 14.15 which represents a total recordkeeping burden increase from 39,094 to 47,828.

Based on a review of Agency data the total burden hours have increased by 13,367. In the previous extension request FDA included burden for the Center for Food Safety and Applied Nutrition (now known as HFP). However, upon reevaluation of these burden estimates, HFP offers a "Certificate of Exportability" for conventional foods, food additives, food contact substances, and infant formula products that cannot be legally marketed in the United States but meets the requirements of section 801(e) of the FD&C Act and may be legally exported (<https://www.fda.gov/food/exporting-food-products-united-states/food-export-certificates>). An interested person may apply for this certificate electronically using the Export Certification Application and Tracking System (<https://www.fda.gov/food/food-export-certificates/online-applications-export-certificates-food>). As part of the application, the interested person attests to compliance with section 801(e) of the FD&C Act as provided in 21 CFR 1.101(b). This information collection activity is approved under OMB control number 0910-0793.
