SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a revision to a currently approved information collection.

On October 10, 2008, NMFS published a final rule (0648-AS36) implementing seasonal speed restrictions along the east coast of the U.S. to reduce the incidence and

severity of vessel collisions with North Atlantic right whales (73 FR 60173). The final rule contained a mandatory collection-of-information requirement subject to the Paperwork Reduction act (PRA), which collects information about safety deviations from the rule in alignment with 50 CFR 224.105(c). The restrictions are in effect seasonally in discrete areas along the U.S. eastern seaboard. NMFS provided a safety exception to the restrictions due to poor weather or sea conditions. Ships' captains are required to make an entry into the vessel's Official Logbook when an exception is necessary.

This revision to the current information collection includes a voluntary survey effort of vessel operators to evaluate their ability and willingness to: (1) Comply with North Atlantic right whale mandatory speed restrictions, and (2) cooperate with voluntary speed reduction efforts to protect North Atlantic right whales, which are promoted through NMFS outreach efforts. We will collect information from two types of vessels (pleasure yachts and large ocean going vessels) in two different areas of the North Atlantic right whales' range using voluntary online surveys and small focus groups. The surveys will collect information about vessel operators' time spent on the water, experience and knowledge about large whales, knowledge of North Atlantic vessel strike reduction efforts, opinions about these whales and conservation efforts, and their preferred means of receiving information. Results from this information collection will be used to develop effective outreach to these vessel communities, with the long-term goal of improving the communities' compliance with mandatory measures and cooperation with voluntary measures that support North Atlantic right whale vessel strike reduction conservation efforts.

II. Method of Collection

New survey information will be collected in two ways. Surveys will be administered electronically. Focus group information will be collected either in person or virtually during 2.5-hour face-to-face or virtual meetings.

The information collection requires an entry into the vessel's hard copy logbook.
