SUPPLEMENTARY INFORMATION:

Background

The Sirex woodwasp (*Sirex noctilio* Fabricius [Hymenoptera: Siricidae]) is a member of the horntail wasp family native to Europe, Asia, and northern Africa, where it is generally considered to be a secondary pest. In its native range, it attacks pines, such as Austrian (*Pinus nigra*), maritime (*P. pinaster*), and Scotch (*P. sylvestris*) pines, almost exclusively. While stressed trees are most at risk, Sirex woodwasp can also attack and kill healthy trees. Adult wasps are strong fliers and can naturally disperse up to 25 miles, especially when aided by strong winds. Sirex woodwasp can survive transportation in infested materials, such as logs, that are moved

long distances and then be capable of infesting new areas. Because Sirex woodwasp inhabits the sapwood and larvae tunnel deep into host trees, this pest is difficult to detect with inspection.

Pines are the main hosts of Sirex woodwasp, which can complete its lifecycle on many species of pines. Thus far, in North America, jack pine (*P. banksiana*), red pine (*P. resinosa*), Scotch pine (*P. sylvestris*), and white pine (*P. strobus*) have served as hosts for Sirex woodwasp. In addition, Sirex woodwasp has been recorded on other conifers such as Douglas fir (*Pseudotsuga* spp.), fir (*Abies* spp.), larch (*Larix* spp.), and spruce (*Picea* spp.).

The first detection of a breeding population of the Sirex woodwasp in the United States was in 2004 in Oswego County, NY. As a result of surveys conducted in 2005, 2006, and 2007 by State and Federal officials, the Sirex woodwasp has been detected in additional counties in Michigan, New York, Pennsylvania, and Vermont.

In an environmental assessment prepared in March 2007, APHIS considered a program to control Sirex woodwasp in New York and Pennsylvania, the only States where Sirex woodwasp had been detected at that time. The environmental assessment evaluated four alternatives: No action, a quarantine program, a biological control program, and a combination of quarantine and biological control (preferred action) in New York and Pennsylvania. A finding of no significant impact was signed on June 21, 2007, in which APHIS determined that the proposed program (including quarantine and biological control) identified as the preferred action would not have a significant impact on the quality of the human environment in those States. Since that time, Sirex woodwasp has been detected in additional States, and APHIS would like to implement a biological control program in those States. In addition, if Sirex woodwasp were detected in other States, APHIS would want to implement a biological control program in those States, as well. Therefore, this environmental assessment considers the potential effects on the quality of the human environment from implementing a program for control of Sirex woodwasp in all of the currently infested States and in surrounding States where Sirex woodwasp would most likely be detected if it were to spread.

APHIS' review and analysis of the potential environmental impacts associated with this proposed biological

control program are documented in detail in an environmental assessment entitled "Proposed Program for the Control of the Woodwasp *Sirex noctilio* F. (Hymenoptera: Siricidae) in the Northeastern United States" (May 2008). We are making this environmental assessment available to the public for review and comment. We will consider all comments that we receive on or before the date listed under the heading **DATES** at the beginning of this notice.

The environmental assessment may be viewed on the Regulations.gov Web site or in our reading room (see **ADDRESSES** above for a link to Regulations.gov and information on the location and hours of the reading room). You may request paper copies of the environmental assessment by calling or writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. Please refer to the title of the environmental assessment when requesting copies.

The environmental assessment has been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500-1508), (3) USDA regulations implementing NEPA (7 CFR part 1), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 15th day of July 2008.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.

Section 538 Guaranteed Rural Rental Housing Program (GRRHP) Demonstration Program for Fiscal Year 2008

AGENCY: Rural Housing Service, USDA.

ACTION: Notice; amendment.

SUMMARY: The Rural Housing Service
(RHS) is amending a notice published
April 21, 2008 (73 FR 21305-21307).
This action is taken to extend the
application obligation date of eligible
applications. This amendment is to
ensure that all applications that meet
program criteria and have responded
accordingly will be considered in the
Demonstration Program.

Accordingly, the Notice published on
April 21, 2008 (73 FR 21305-21307), is
amended as follows:

On page 21306, in the second column,
second paragraph, under the heading
"Demonstration Program Selection
Process," the second paragraph is
amended to read as follows: "The first
round of selections into the
Demonstration Program will be made on
April 25, 2008. In the event there are not
enough qualified requests for selection
into the Demonstration Program to
utilize all the available Demonstration
Program set-aside funds of
approximately \$13 million, then the
selection process for any remaining
funds will be conducted again on July
11, 2008. If needed, an additional
selection process will be conducted
again on September 29, 2008. All
applicants will be notified of the
selection results no later than 30
business days from the date of
selection."

Dated: July 3, 2008.
