

species by weight. All fish in the sub-sample would be weighed, and length measurements would be taken for cod and other non-target catch. All bycatch would be returned to the sea as soon as practicable following data collection. Exemption from minimum sizes would support catch sampling activities and ensure the vessel is not in conflict with possession regulations while collecting catch data. All trips would otherwise be conducted in a manner consistent with normal commercial fishing conditions and catch consistent with the Northeast Multispecies FMP would be retained for sale. Trips not accompanied by GMRI researchers would be required to carry an At-Sea Monitor (ASM), Northeast Fishery Observer Program (NEFOP) observer, or privately contracted data collection technician. On trips assigned to carry an ASM or observer by NEFOP, normal sampling protocols would be carried out. The vessel is responsible for notifying its monitoring provider of upcoming research trips and ensuring a research technician is present on all EFP trips not selected for observer coverage through Pre-Trip Notification System.

GMRI needs this exemption to allow them to conduct testing of a net configuration that is prohibited by the current regulations. If approved, the applicant may request minor modifications and extensions to the EFP

throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.
