The patent rights in these inventions have been assigned to the Government of the United States of America and Georgetown University. The prospective patent license will be for the purpose of consolidating the patent rights to Georgetown, the co-owner of said rights, for commercial development and marketing. Consolidation of these co-owned rights is intended to expedite development of the invention, consistent with the goals of the Bayh-Dole Act codified as 35 U.S.C. 200-212.

The prospective patent license will be worldwide, exclusive, and may be limited to those fields of use commensurate in scope with the patent rights. It will be sublicensable, and any sublicenses granted by Georgetown will be subject to the provisions of 37 CFR part 401 and 404.

This technology discloses a method of detecting the presence of a pancreatic intraepithelial neoplasia lesion *in vivo* via administering to the subject a construct, or a pharmaceutically acceptable salt thereof, wherein the construct is comprised of siRNA-polymer nanoparticle complex that selectively bind to cholecystokinin-B receptors. The nanoparticle can be conjugated with a fluorophore or radioactive molecule (e.g., technetium). In conjunction with an imaging device, the polyplex nanoparticle could be used to detect the presence of precancerous pancreatic intraepithelial neoplasia (PanIN) lesions.

This notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless

within fifteen (15) days from the date of this published notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially, and may be made publicly available.
