The objective of the survey will be to understand the range of attitudes, preferences, and concerns that recreational anglers hold towards saltwater fishing.

The National Marine Fisheries Service, Office of Science and Technology will conduct this survey to improve our understanding of anglers' expectations and how they may change with fish stock recovery. As more stocks recover, the survey is well-timed to inform fisheries management on anglers' satisfaction with current management and the types of goals and objectives that should be pursued (e.g., in developing guidelines). Results of the survey will be used to inform fisheries management and planning and establish a baseline for outreach and education.
