SUPPLEMENTARY INFORMATION:

Background Information

The National Nanotechnology Initiative (NNI), established in 2001, is a U.S. Government research and development initiative of 20 Federal departments, independent agencies, and independent commissions (hereafter referred to as “agencies”) working together toward the common challenging vision of a future in which the ability to understand and control matter at the nanoscale leads to a revolution in technology and industry that benefits society (see *www.nano.gov*). The combined, coordinated efforts of the participating agencies have accelerated the discovery, development, and deployment of nanotechnology to address agency mission goals and broader national
