This deviation is necessary to facilitate electrical repairs and will allow the owner to temporarily close the draw for a period not to exceed 10 hours.

DATES: This deviation is effective from 7 p.m. on August 14, 2017 through 5 a.m. on August 15, 2017.

SUPPLEMENTARY INFORMATION: The owner of the bridge, the Connecticut Department of Transportation, requested a temporary deviation in order to facilitate repair and replacement of electrical conduits controlling span power lock and control.

The Washington Street S136 Bridge across the Norwalk River, mile 0.0 at Norwalk, Connecticut is a double-leaf bascule bridge with a vertical clearance of 9 feet at mean high water and 16 feet at mean low water in the closed position. The existing drawbridge operating regulations are listed at 33 CFR 117.217(a).

The temporary deviation will allow the Washington Street S136 Bridge to remain closed from 7 p.m. on August 14, 2017 through 5 a.m. on August 15, 2017. The waterway is used primarily by seasonal recreational vessels and occasional tug/barge traffic. Coordination with waterway users has indicated no objections to the proposed short-term closure of the draw.

Vessels that can pass under the bridge without an opening may do so at all

times. The bridge will not be able to open for emergencies. There is no alternate route for vessels to pass.

The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: August 4, 2017.
