Title: Diversions, Return Flows, and Consumptive Use of Colorado River Water in the Lower Colorado River Basin.

OMB No.: 1006-0015.

Abstract: Reclamation delivers Colorado River water to water users for diversion and beneficial consumptive use in the States of Arizona, California, and Nevada. Under Supreme Court order, the United States is required, at least annually, to prepare and maintain complete, detailed, and accurate records of diversions of water, return flow, and consumptive use. This information is needed to ensure that a State or a water user within a State does not exceed its authorized use of Colorado River water. Water users are obligated by provisions in their water delivery contracts to provide Reclamation information on diversions and return flows. Reclamation determines the consumptive use by subtracting return flow from diversions or by other engineering means. Without the information collected, Reclamation could not comply with the order of the United States Supreme Court to prepare and maintain detailed and accurate records of diversions, return flow, and consumptive use.

Description of respondents: The Lower Basin States (Arizona, California,

and Nevada), local and tribal entities, water districts, and individuals that use Colorado River water.

Frequency: Monthly, annually, or otherwise as determined by the Secretary of the Interior.

Estimated total number of respondents: 54.

Estimated total number of annual responses: 330.

Estimated total annual burden hours: 290.
