j. *Deadline for filing comments and or motions:* August 11, 2003.

k. *Description of Amendment:* The licensee proposes the following design changes: (1) Installing 105 small turbines and generators, instead of the licensed three large turbines and generators, resulting in a reduction in the authorized capacity from 105 MW to 68.7 MW, (2) placing seven transformers and switchgears, and (3) constructing a 2-mile-long transmission line, instead of the licensed 5.1-mile-long route. The change in project design is to install 105 smaller units that would be fitted in seven modules, each located in a gate bay of the existing dam. This installation eliminates construction of an intake and tailrace, in effect, avoiding dredging, excavation, and spoil disposal. The proposed transmission line alignment will be along an existing transmission line to the point of interconnection with an existing line of Kentucky Utilities. This proposed alignment would require the clearing of about 10 acres of land.
