The patent rights in these inventions have been assigned and/or exclusively licensed to the government of the United States of America.

The prospective exclusive license territory may be worldwide, and the field of use may be limited to the following:

"Development, manufacture and commercialization of T cell therapy products engineered to express the chimeric antigen receptor(s) claimed in the Licensed Patent Rights for the treatment of mesothelin-expressing cancers in humans."

The E-078-2012 invention family discloses certain chimeric antigen receptors (CARs) targeting mesothelin. CARs are synthetic proteins comprised of extracellular antigen binding domains and intracellular signaling domains designed to activate the cytolytic functions of CAR-expressing T cells upon antigen recognition.

Mesothelin is a cell surface protein. Its expression is primarily restricted to mesothelial cells of the pleura, peritoneum, and pericardium; however, research has demonstrated that several cancers, including malignant mesothelioma, pancreatic, ovarian and lung adenocarcinoma, also express mesothelin under certain circumstances. Due to its limited expression in normal tissues, CARs targeting mesothelin may be useful in the development of T cell therapy products for the treatment of select cancers.

This Notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published Notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information from these license applications will be made only as required and upon a request under the

Freedom of Information Act, 5 U.S.C. 552.

Dated: October 1, 2021.
