Tolerance Crop Grouping Program IV

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing revisions to its pesticide tolerance crop grouping regulations, which allow the establishment of tolerances for multiple, related crops based on data from a representative set of crops. EPA is proposing five new crop groups, two new and two revised commodity definitions, and revisions to the regulations on the interaction of crop group tolerances with processed food tolerances and meat, milk, and egg tolerances. Once final, EPA expects these revisions to promote greater use of crop groupings for tolerance-setting purposes, both domestically and in countries that export food to the United States. This is the fourth in a series of planned crop group updates expected to be proposed over the next several years.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Legal Authority

EPA is initiating this rulemaking to amend the existing crop grouping regulations under section 408(e)(1)(C) of the Federal Food, Drug, and Cosmetic Act (FFDCA), which authorizes EPA to establish "general procedures and requirements to implement [section 408]." 21 U.S.C. 346a(e)(1)(C). Under FFDCA section 408, EPA is authorized to establish tolerances for pesticide chemical residues in food. EPA establishes tolerances for each pesticide based on the potential risks to human health posed by that pesticide. A tolerance is the maximum permissible residue level established for a pesticide in raw agricultural produce and processed foods. The crop group regulations currently in §§ 180.40 and 180.41 enable the establishment of tolerances for a group of crops based on residue data for certain crops that are representative of the group and have been established under FFDCA section 408(e)(1)(C).
