Regulations Governing Off-the-Record Communications; Public Notice

January 17, 2003.

This constitutes notice, in accordance with 18 CFR 385.2201(h), of the receipt of exempt and prohibited off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive an exempt or a prohibited off-the-record

communication relevant to the merits of a contested on-the-record proceeding, to deliver a copy of the communication, if written, or a summary of the substance of any oral communication, to the Secretary.

Prohibited communications will be included in a public, non-decisional file associated with, but not part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such requests only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication should serve the

document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications will be included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of exempt and prohibited off-the-record communications recently received in the Office of the Secretary. Electric Quarterly Reports; Revised Public Utility Filing Requirements Docket No. RM01-8-000; Notice of Extension of Time

January 17, 2003.

On December 19, 2002, the Commission issued Order 2001-C, specifying details about the requirement for utilities to file a list of conforming contracts (as mandated in Order 2001) and requiring future Electric Quarterly Reports to be filed using the new Electric Quarterly Report Submission

Software. Both the list of conforming contracts and the fourth quarter Electric Quarterly Report are due to be filed on or before January 31, 2003.

Numerous filers have requested an extension of time in order to compile the required data and adjust to the new software requirements. In consideration of this situation, notice is hereby given that the time to file the list of conforming contracts and the fourth quarter 2002 Electric Quarterly Report is extended to and including February 14, 2003.

Title: Mobile Source Emission Factor On-Highway Recruitment (OMB Control No. 2060-0078; EPA ICR No. 0619.10) expiring 06/30/2003.

Abstract: The EPA Emission Inventory Group, through contractors, solicits the general public to voluntarily offer their vehicle for emissions testing. There are two methods used to solicit the general public for participation in Emission Factors Program (EFP):

1. Postal cards are sent to a random selection of vehicle owners using State motor vehicle registration lists; and
2. A random selection of motor vehicle owners, who arrive at State inspection stations on an annual or biennial schedule, are solicited.

The legislative basis for the Emission Factors Program is section 103(a)(1)(2)(3) of the Clean Air Act, which requires the Administrator to "conduct * * * research, investigations, experiments, demonstrations, surveys, and studies relating to the causes, effects, extent, prevention, and control of air pollution" and "conduct investigations and research and make surveys concerning any specific problem of air pollution in cooperation with any air pollution control agency * * *".

EPA uses the data from the EFP to verify predictions of the computer model known as MOBILE, which calculates the contribution of mobile source emissions to ambient air pollution. MOBILE is used by EPA, state and local air pollution agencies, the automotive industry, and other parties that are interested in estimating mobile source emissions. These estimates, when generated by governments are the basis for State Implementation Plans (SIPs), and Reasonable Further Progress

(RFP) reports for the attainment status assessments for the National Ambient Air Quality Standards (NAAQS).

Furthermore, the EFP data collected under this ICR will be used to construct a new model to replace MOBILE, the "Multi-scale Motor Vehicle & Equipment Emission System" (MOVES). MOVES will be based on field sample data as opposed to laboratory simulations. This change is due to recommendations made to EPA by the National Research Council, the Office of Management and Budget and is enabled by the availability of suitable technology for the collection of emission and activity data while the vehicles are being used by their owners/operators. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: Public reporting burden for this collection of information is estimated to average 10 minutes to 2 hours per response, including the time for reviewing instructions, delivering the vehicle for testing, installing or uninstalling field sampling equipment on the vehicle, or in some instance filling out a travel log. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and

providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.
