SUPPLEMENTARY INFORMATION: USACE is seeking public input on its proposed draft purpose and need statements for developing the Plan/EIS. The Plan is needed to fully implement the direction received in Subsection (a) of Section 5018 of the Water Resources Development Act of 2007; and address current trends indicating: diminished natural habitat; reduced populations of native species and communities; and reduced variability of physical processes such as flows, flooding, and sediment erosion/deposition. Therefore, the draft purpose of the Plan is to determine the actions required to mitigate losses of aquatic and terrestrial habitat; to recover federally listed species under the Endangered Species Act; and to restore the ecosystem to prevent further declines among other native species, while seeking to balance with social, economic, and cultural values for future generations. The overall goal of the planning process is to result in a sustainable decision that will guide mitigation, recovery, and restoration actions over the next 30 to 50 years.

In addition to seeking input on the proposed draft purpose and need for the Plan, the USACE is also seeking comments on what specific natural resources should be addressed and other issues that should be considered in this type of plan.

USACE is hosting public scoping meetings throughout the basin to address the plan purpose, need, and target resources. For specific information regarding these meetings (dates, locations, and times) please see <http://www.mrerp.org>.

All meetings are accessible to people with disabilities. Any individual with a disability who requires special assistance, such as a sign language interpreter, or a translator, please contact either project manager listed above at least 48 hours in advance of the meeting so that arrangements can be made.

Additional information about the Missouri River Ecosystem Restoration Plan can be found at <http://www.mrerp.org>.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8785-9; Docket ID No. EPA-HQ-ORD-2009-0173]

Physiological Parameters Database for PBPK Modeling

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public comment period.

SUMMARY: EPA is announcing a public comment period for an on-line database file, using the Microsoft® Access database management system, that contains a comprehensive collection of physiological parameter data intended to be suitable for application in physiologically based pharmacokinetic (PBPK) modeling. The public comment period will be for 30 days. EPA requests that interested users comment on the functionality or usability of this resource and provide comments that may be considered for improving the final product.

The draft database represents a compilation of several individual databases developed over the past few years. It contains physiological parameter data for humans from infancy through old age, as well as data for experimental laboratory species. EPA requests that end-users provide feedback regarding their experience working with this database. Users are also encouraged to comment on specific studies or methods employed in the

studies included in the entire draft database.

As a means of quality assurance and quality control (QA/QC), about 30% of the data entries, randomly selected, have been verified by an independent contractor. This QA/QC process will be ongoing.

DATES: The 30-day public comment period begins April 16, 2009 and ends May 18, 2009. Technical comments should be in writing and must be received by EPA by close of business, May 18, 2009.

ADDRESSES: The draft database is available for download from the U.S. EPA Web site <http://cfpub.epa.gov/ncea/cfm/recordisplay.cfm?deid=204443>. Users must have Microsoft® Access in order to open and manipulate the database file.

Comments may be submitted electronically via EPA's E-Docket, by mail, by facsimile, or by hand delivery/courier. Please follow the detailed instructions as provided in the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: For information on the public comment period, contact the Office of Environmental Information Docket; telephone: 202-566-1752; facsimile: 202-566-1753; or e-mail: ORD.Docket@epa.gov.

If you have questions about the database, please contact the Information Management Staff, National Center for Environmental Assessment, U.S. Environmental Protection Agency, Washington, DC 20460; telephone: 703-347-8561; facsimile: 703-347-8691; or e-mail: NCEADC.Comment@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Information About the Product

Physiologically based pharmacokinetic (PBPK) models represent an important class of dosimetry models that are useful for predicting internal dose at target organs for risk assessment applications. Dose-response relationships that appear unclear or confusing at the administered dose level can become more understandable when expressed on the basis of internal dose of the chemical. To predict internal dose level, PBPK models use physiological data to construct mathematical representations of biological processes associated with the absorption, distribution, metabolism, and elimination of compounds. With the appropriate data, these models can be used to extrapolate across species, lifestages, and exposure scenarios, as well as address various sources of uncertainty in risk

assessments. This database contains a collection of physiological data relevant for parameterizing PBPK models for children, adults, and the elderly. In addition, the database contains physiological data for parameterizing PBPK models for young (i.e., developing) and adult rodents.
