BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-22-20MR; Docket No. CDC-2022-0018]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Leptospirosis and Melioidosis Active Hospital-based Surveillance in Puerto Rico. The project aims to identify leptospirosis and melioidosis cases in Puerto Rico by establishing active surveillance for both diseases at four hospital sites for disease identification and treatment and to improve understanding of leptospirosis and melioidosis epidemiology and ecology in Puerto Rico for public health control and prevention planning.

DATES: CDC must receive written comments on or before April 5, 2022.

ADDRESSES: You may submit comments, identified by Docket No. CDC-2022-0018 by either of the following methods:

- *Federal eRulemaking Portal:* Regulations.gov. Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600

Clifton Road NE, MS H21-8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to regulations.gov.

Please note: Submit all comments through the Federal eRulemaking portal (regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21-8, Atlanta, Georgia 30329; phone: 404-639-7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the

use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and

5. Assess information collection costs.

Proposed Project

Leptospirosis and Melioidosis Active Hospital-based Surveillance in Puerto Rico—Existing Collection in Use Without an OMB Control Number—National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

This project aims to identify leptospirosis and melioidosis cases in Puerto Rico by establishing active surveillance for both diseases at four hospital sites for timely disease identification and treatment and to improve understanding of leptospirosis and melioidosis epidemiology and ecology in Puerto Rico for public health control and prevention planning. Both diseases can cause outbreaks after hurricanes and flooding, especially in tropical areas, and this project is being conducted in response to an increase in leptospirosis cases after Hurricanes Irma and Maria in 2017.

Participants will be recruited from the population presenting to the emergency department of the four hospital sites with febrile illness, and will be interviewed to gather information on symptoms, possible exposures, and medical history, in addition to having diagnostic samples collected to test for leptospirosis plus or minus melioidosis (depending on presenting symptoms). Participants will also be interviewed approximately two weeks after enrollment to determine illness progression and outcome. Patients testing positive for leptospirosis, if willing, may have animal samples taken from their home or work environments to help determine the animal reservoirs related to human leptospirosis illness in Puerto Rico.

CDC requests OMB approval for an estimated 1,675 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Patient	PIFA (screening)	Up to 7,000	1	5/60	583

ESTIMATED ANNUALIZED BURDEN HOURS—Continued

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Patient	PIFA (full form: sections 1–4, 11)	Up to 3,000	1	10/60	500
Patient	Consent Form	Up to 3,000	1	6/60	300
Patient	PIFF	Up to 1,000	1	10/60	167
Patient	Animal Household Survey	Up to 250	1	30/60	125
Total					1,675

[30Day–22–1014]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled CDC Worksite Health ScoreCard (CDC ScoreCard) to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on September 27, 2021 to obtain comments from the public and affected agencies. CDC received two comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

CDC Worksite Health ScoreCard (CDC ScoreCard) (OMB Control No. 0920–1014, Exp. 3/31/2022)—Extension—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC) has established the Worksite Health ScoreCard (CDC ScoreCard), an online organizational assessment tool, to enable employers to assess the number of evidence-based health promotion interventions or strategies in their worksites to promote employee health and well-being.

The CDC ScoreCard will support small, mid-size, and large employers with three primary goals: (1) Assist

employers in identifying gaps in their health promotion programs, and help them to prioritize high-impact strategies for health promotion at their worksites; (2) Improve the health and wellbeing of employees and their families through science-based workplace health interventions and promising practices; and (3) Support research and increase understanding of the organizational programs, policies, and practices that employers of various sizes and industry sectors have implemented to support healthy lifestyle behaviors.

CDC is requesting an extension to a previously approved data collection enabling existing employer users as well as new users to continue to have access to the CDC ScoreCard web-based organizational assessment tool (available at <http://www.cdc.gov/healthscorecard>).

CDC will provide outreach to, and register approximately 800 employers per year to use the online survey, which is open to employers of all sizes, industry sectors, and geographic locations across the country. CDC ScoreCard users will create a user account, complete the online assessment and receive an immediate feedback report that summarizes the current status of their worksite health program; identifies gaps in current programming; benchmarks individual employer results against other users of the system; and provides access to worksite health tools and resources to address employer gaps and priority program areas.

CDC will use the information collected to evaluate the effectiveness of the CDC ScoreCard in terms of (1) identifying success drivers for building and maintaining successful workplace health programs; (2) raising awareness and knowledge of science-based worksite health programs, policies and practices; and (3) developing additional worksite health tools and resources for employers. The information will also be used to evaluate the impact of the CDC Worksite Health Scorecard on employer adoption of worksite health programs, policies, and environmental supports.
